Senior Health Stability/Humanitarian Assistance Specialist

International Health Division

Office of the Assistant Secretary of Defense (Health  
Affairs)

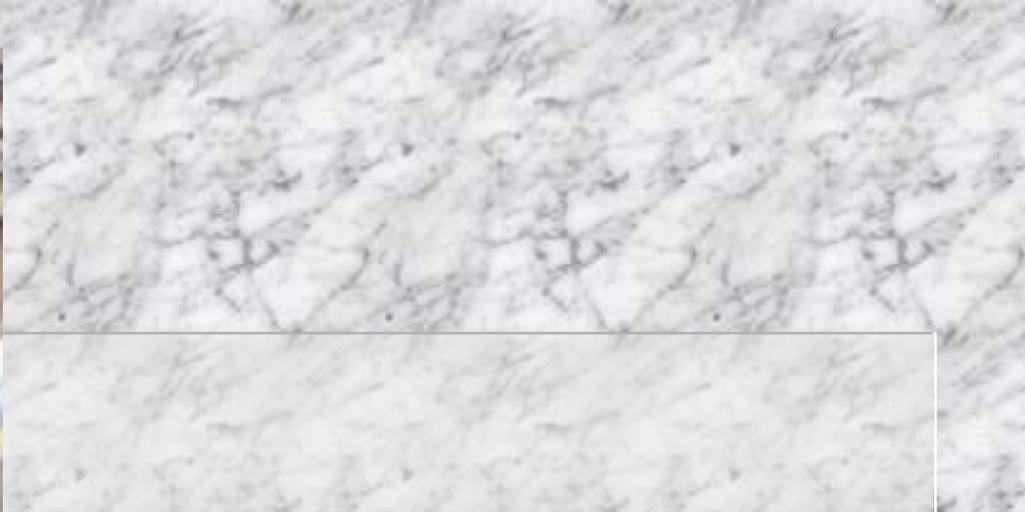

CDHAM/USUHS

# Afghanistan 2000-2001

# Afghanistan

- 20 years of armed conflict and human rights violations
- Soviet Occupation:1979-1992 with ~ 1 million killed
- Largest single caseload of refugees in the world
  - 1.4 million refugees in Iran and 1.2 million in Pakistan
  - 75% of the refugees are women and children
- Violent power struggles between Mujahedin groups after the Soviet occupation

# Afghanistan since 1994

- “Taliban” emerge
  - “students of Muslim religious studies”
  - poorly educated Pashtun refugee youths
  - Led by Mullah Mohammed Omar
- In 2000; controlled 95% of the country
- Claim: restore peace and security through “Islamic law”
- Edicts imposing Taliban interpretation Shari’a law in conflict with international human rights

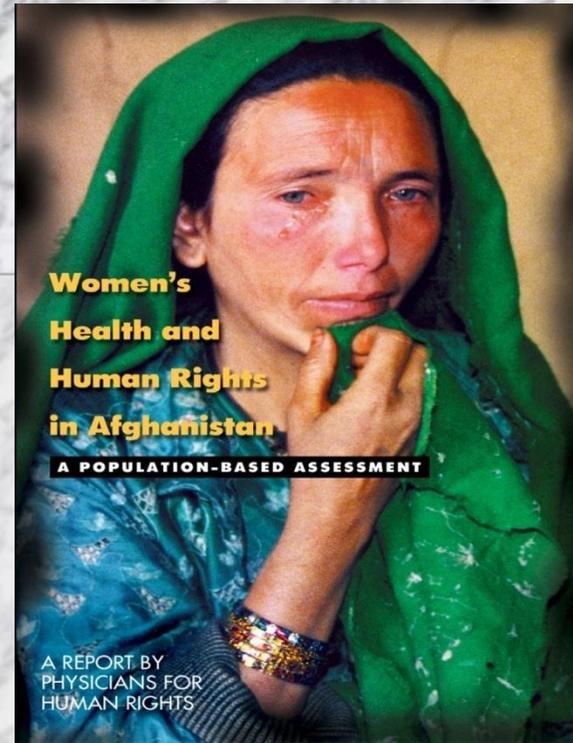

# Women in Afghanistan: Official Taliban Policies

- May only leave home when escorted by close male relative
- Access to health care limited to seeing female physicians
- May not attend school
  - Except religious school up to 8 years of age
- May not work outside the home
  - Prior to Taliban:
    - 70% of all teachers
    - 50% of civil servants
    - 40% of physicians

# Health and Human Rights Survey Development

- Needs
  - English and Farsi version
  - Ease of Administration
  - Safety\*
- Translated - Back Translated
- Database designed before going into the field
- Data collector training
- Piloted in the field
  - Changes agreed upon by team

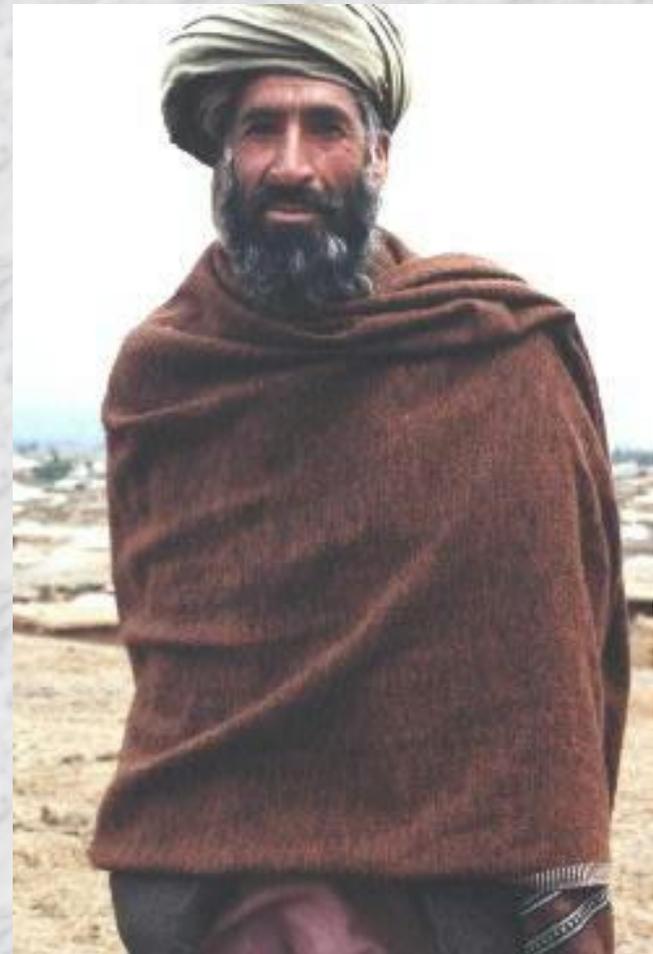

# Safety Measures Taken

- Coded words or phrases
- No identifiers
  - Data Collectors
  - Respondents
- Letters of safety
- Unidentifiable data sheets
- Questions “buried”
- E-mail database periodically from the field
  - Data entry in the field when possible

# Methods

- Informed consent
- Randomized survey:
  - Afghanistan Residents (n=346)
    - Non-Taliban Controlled Area
      - Urban/Rural
      - Women and Men
  - Afghanistan Residents (n=400)
    - Taliban Controlled Area
      - Urban /Rural
      - Women and Men

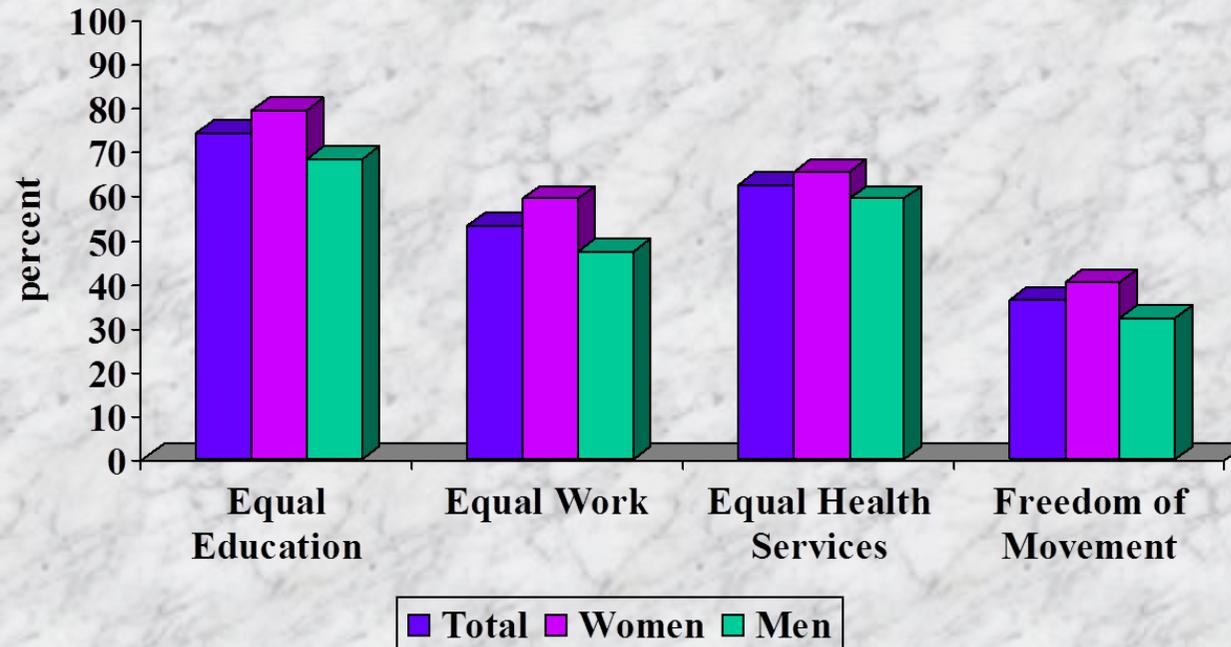

# Sampling

- **Women**
- **Close male relative**
- **Urban Areas**
  - City planning map
  - Sectors randomly chosen
  - # homes/# needed
- **Rural Areas**
  - Mapped area
  - # homes/ # needed

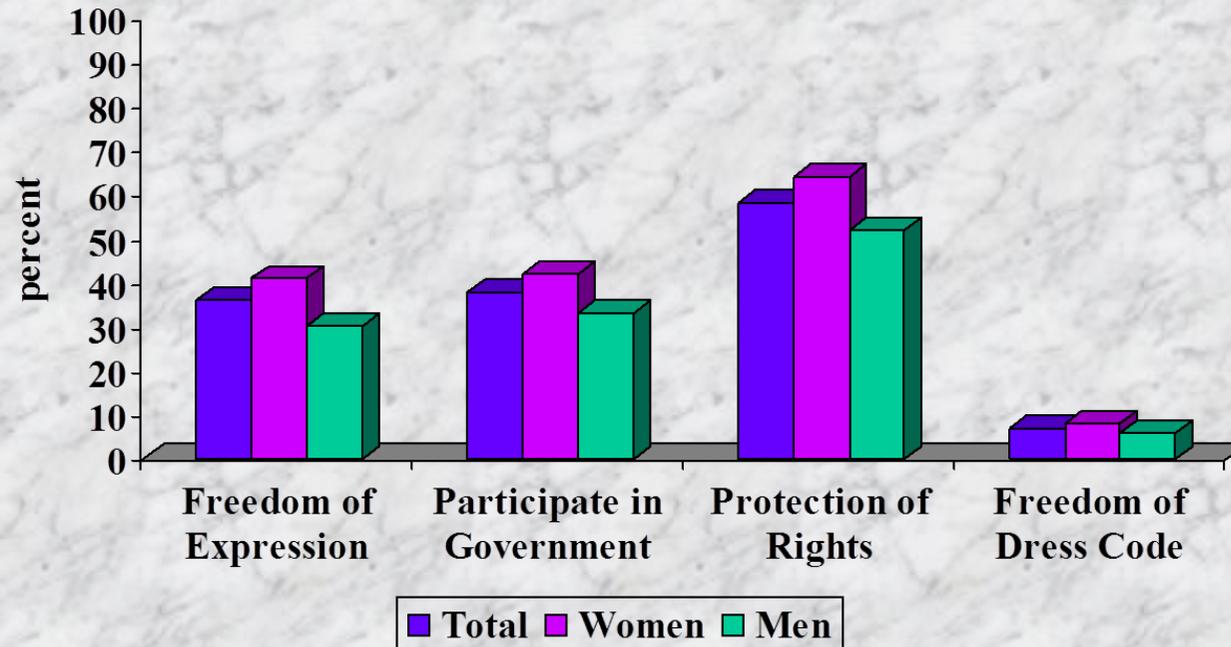

# 2000 Freedom and Needs Survey: Human Rights of Women

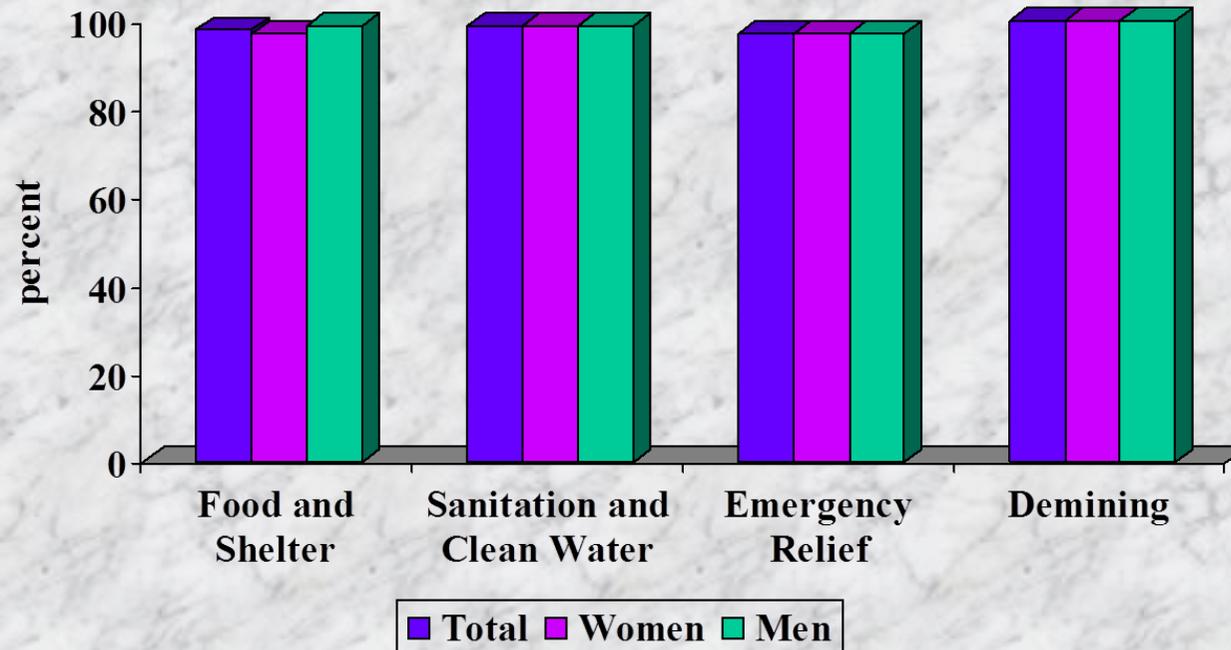

Rated as "very" or "extremely" important for health and development of community

# 2000 Freedom and Needs Survey: Human Rights of Women

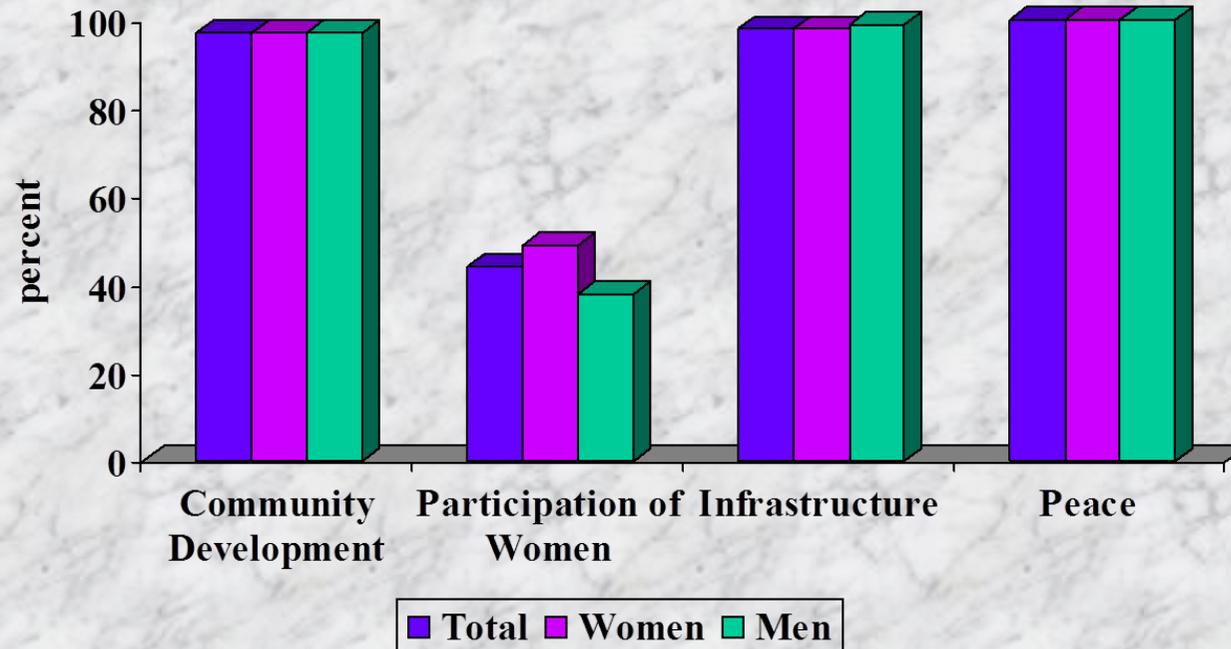

Rated as "very" or "extremely" important for health and development of community

# 2000 Freedom and Needs Survey: Basic Needs

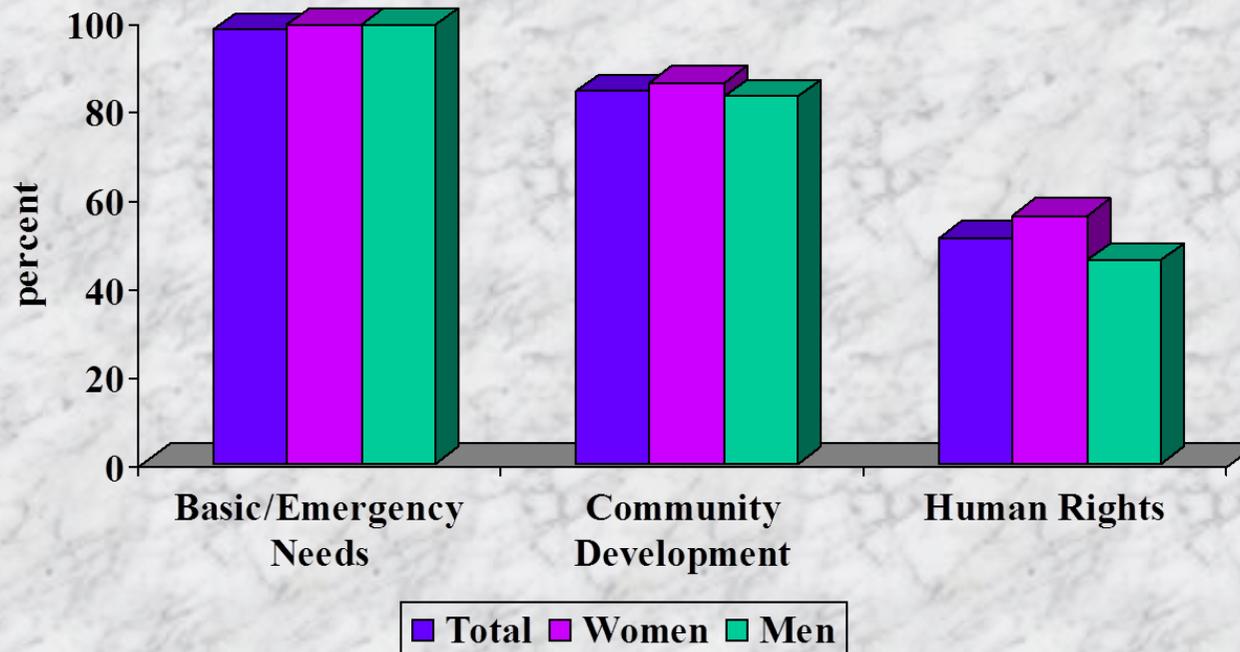

Rated as "very" or "extremely" important for health and development of community

# 2000 Freedom and Needs Survey: Community Development

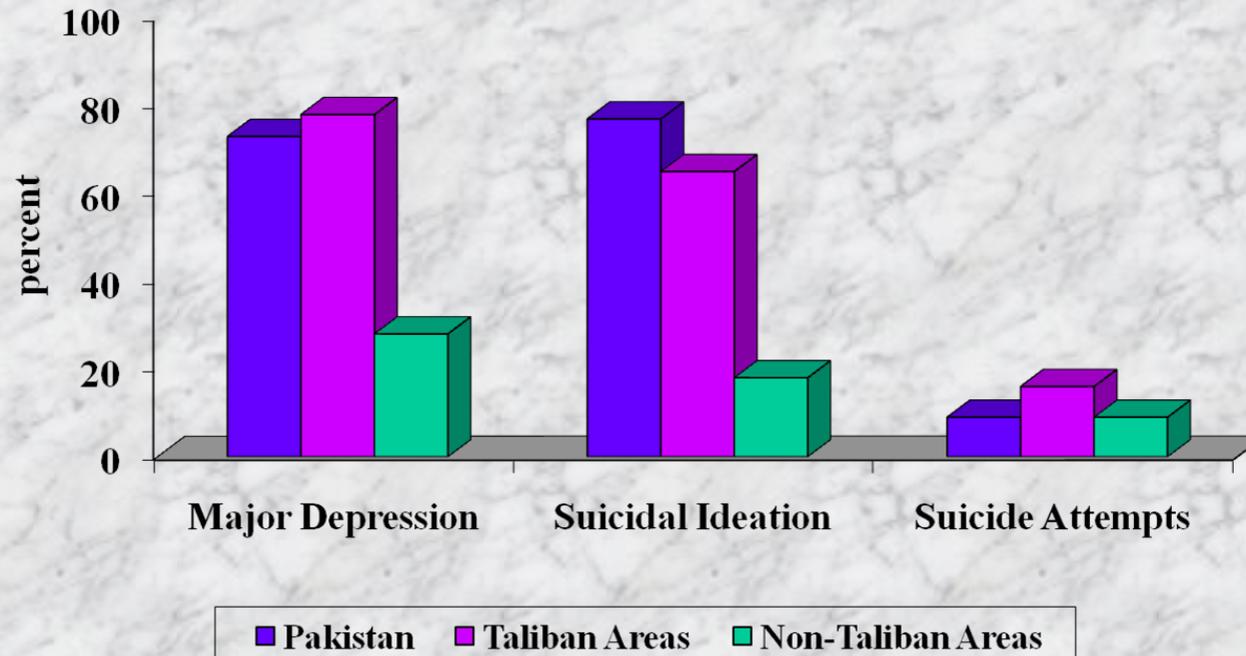

Rated as "very" or "extremely" important for health and development of community

# Freedom and Needs Survey: Basic Human Needs versus Individual Freedoms

Rated as "very" or "extremely" important for health and development of community

# Mental Health Among Women

# Summary.....

- Afghan women and men believe community development includes *basic human needs* and *individual freedoms*
- Official policies restricting women's rights are not consistent with opinions and attitudes identified
- Health practitioners should involve the community in efforts to promote health and well-being

# October 2001

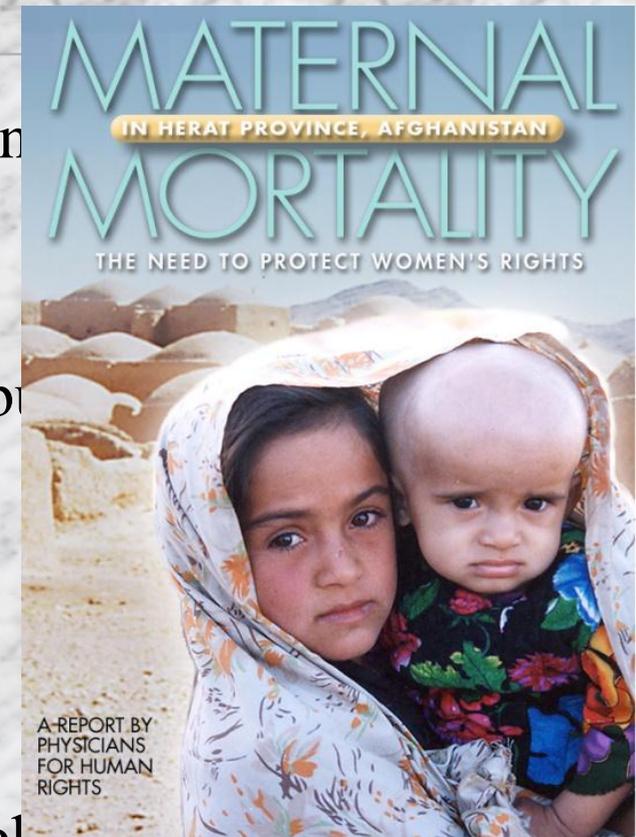

# Maternal Mortality in Herat Afghanistan: An Index of the Status of Women's Rights, 2002

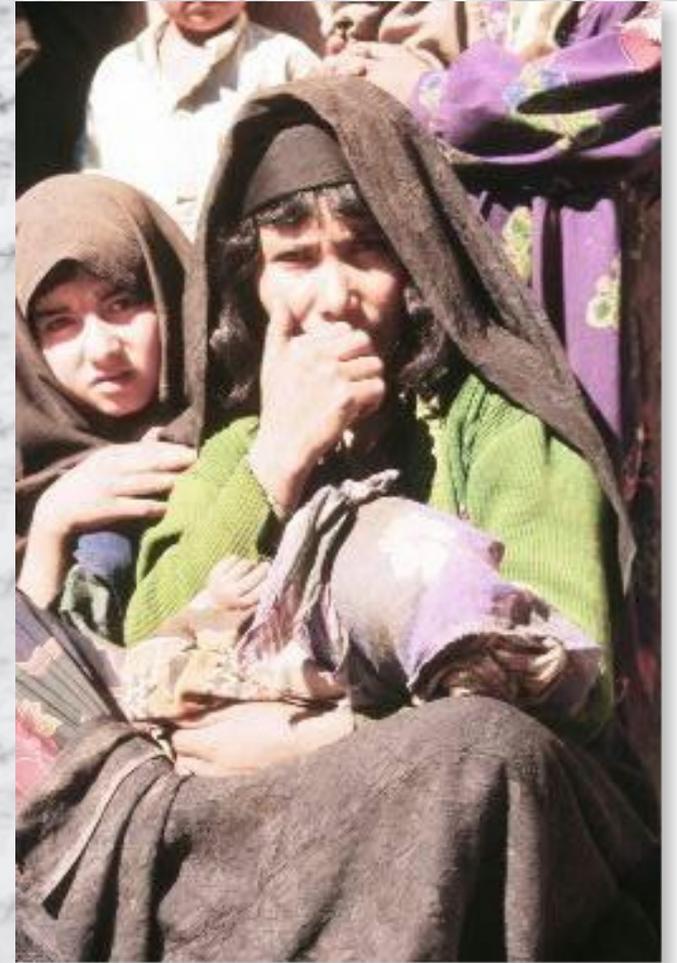

# Purpose of the Study

- Provide a rapid and accurate estimate of maternal mortality in Herat, Afghanistan
- Assess women's human rights that may contribute to maternal mortality
- Assess maternal health services in the region
- Present data with MoPH to congressional panel re. women's health funding post-conflict

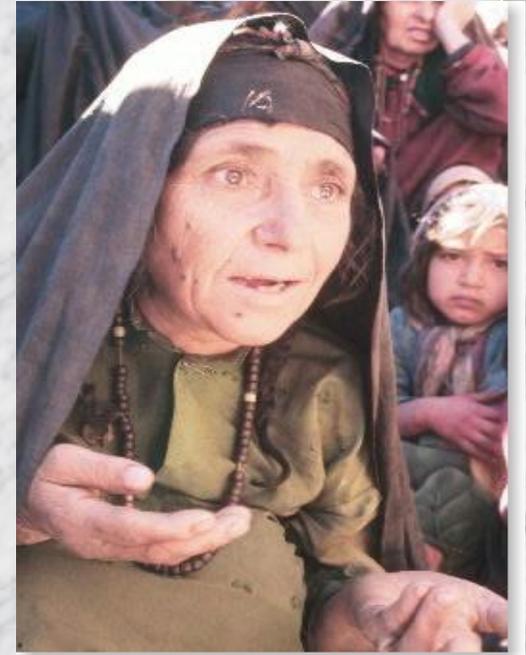

# Methods

- Females age 15-49, n=5014
- 7 of 13 districts in Herat
  - *Random sampling, representing 73% of population*
  - *75% rural and 25% urban*
  - *34 Villages >200 households*
    - *~5 villages per district*
    - *600 household interviews per district*
    - *Within a 4 hour-drive from Herat city*

# Respondent Demographics

- Mean age 31 years old (range 15-49)
- 88% married
- 10% widowed
- On average, lived in area 17 years (range .25-50)
- Mean years of formal education 0.35 years (range 0-16)
- 84% ranked lack of food, shelter and clean water as their primary problems

# Indirect Maternal Mortality Estimate

- *Indirect Sisterhood Method, n=4886*
- *92% of deaths in rural areas*
- *593 maternal deaths/100,000 live births*
- *95% CI 557 to 630*

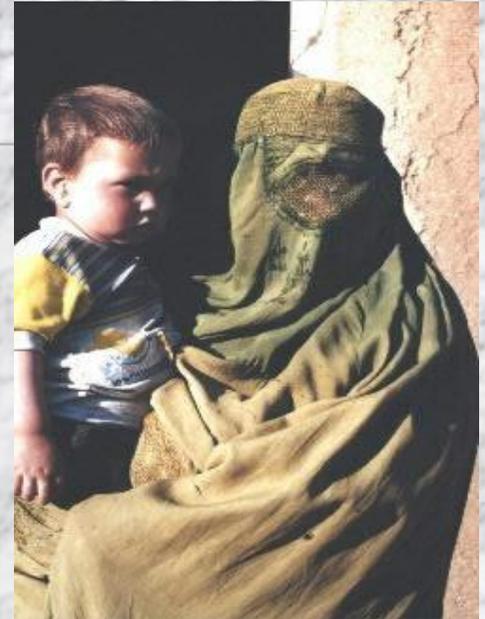

# Marriage, Family, Reproductive Health Characteristics

- Mean age of actual marriage 15 years old (range 5-39)
- Mean desired age of marriage 18 years old (range 5-30)
- 85% wanted to marry at the time of marriage
- 20% reported feeling pressured by family

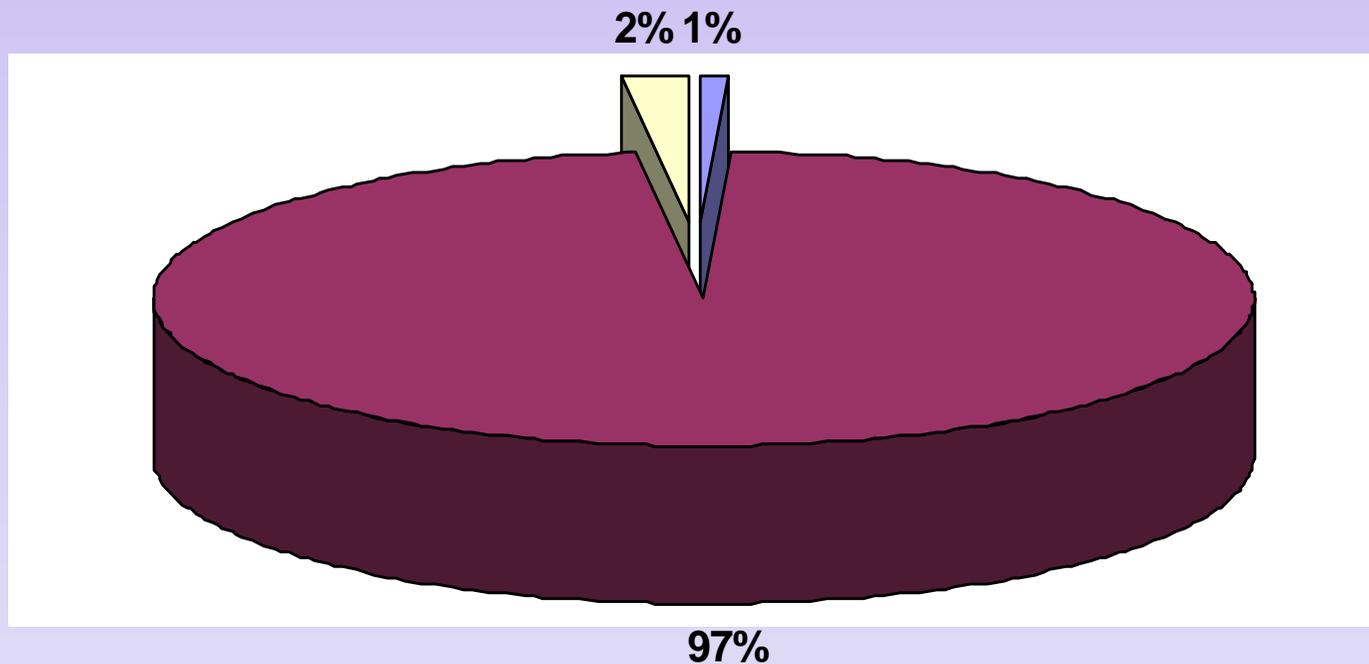

# Marriage, Family, Reproductive Health Characteristics

- Mean desired age of having children 19 years old
- Mean desired number of children = 6 children
- 11% of women received prenatal care
- 74% could not afford prenatal care
- 95% reported needing permission for health care;
  - Less than 1% were refused permission to seek care
- 12% of women used birth control
- 23% desired birth control
- 88% reported that timing and spacing of children was decided equally between husband and wife

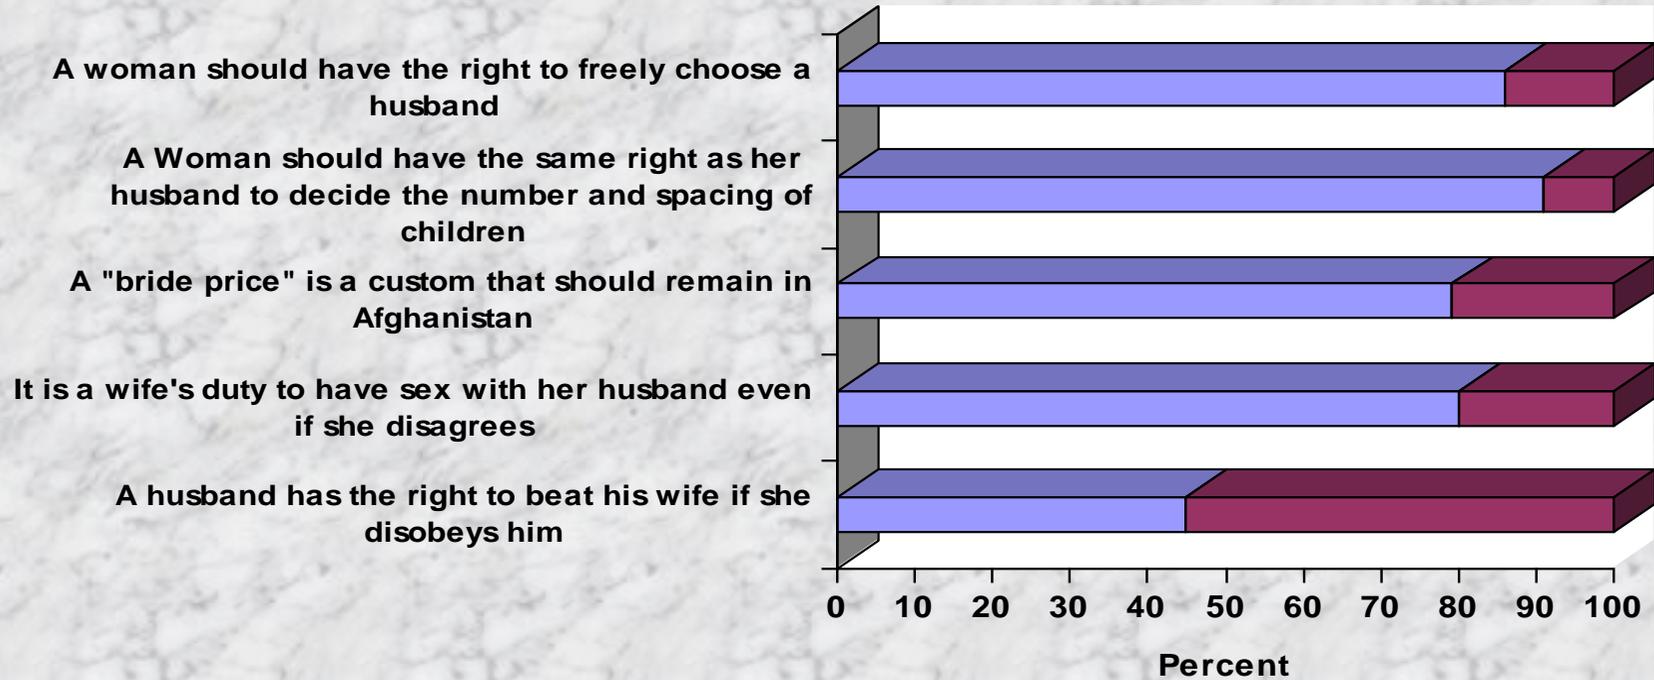

**Figure 1: Proportion of Women With Trained and Untrained Attendants Present at Birth**

Health Professional   Untrained Traditional Birth Attendant   Delivered Alone

**Figure 2: Attitudes and Beliefs about Marriage, Family, and Women's Roles in Society**

Agree Disagree

# Key Recommendations (2002)

- **Maternal health must not be considered a luxury or second stage priority and must be integrated into a public health plan.**
- **Protect Afghan Women's Rights**
- **Address Security Gaps**
- **Extend Women's Health Services**
- **Expand Medical Education**
- **Provide for Basic Needs**
- **Family Planning Services**
- **Protection and Promotion of Human Rights**

# Afghanistan Talking Health Book

# Afghanistan Talking Health Book

# Afghanistan Talking Health Book: Results

- Ceiling effect on knowledge
- Developed at HHS by Afghan Americans
- Translations poor
- No coordination with MoPH
- 80,000 made before testing
- Afghans liked the idea but preferred to have administration with a community health worker

# August 2009

- Met with Afghan Surgeon Generals of ANA and ANP
- Discussion of possible traumatic brain injury study among military/police

# DoD Health Efforts

\*The Department of Defense's Involvement in Civilian Assistance, A Quantitative Description of the Projects Funded by the U.S. Department of Defense's Overseas Humanitarian Assistance, Disaster and Civic Aid Program. Disaster Med Public Health Prep. (In Press)

- Military to Military
  - Military medical school
  - Train the trainers in emergency care, professionalism, first responder
  - Improvement in ANA/ANP hospitals and clinics
- Civilian healthcare supported by few authorizations
  - OHDACA (58-85 million +)
  - HCA – can only be used for projects involved in training of MHS personnel
  - CERP – more common in conflict, commanders intent – may not be coordinated
- OHDACA projects since 2001\*
  - 102 projects in Afghanistan – second to Iraq
  - Primarily school construction and refurbishment, health/water infrastructure, disaster response infrastructure, and disaster response training projects
  - 15% projects were health infrastructure, 40% schools

ABULPARS EDDING ALL

غزوسی کابل پاریسی

*Today.....*

# Observations

- More than 35 restaurants/bars
- 2 Shopping malls
- 10 hotels; several “4Star”
- “Afg-cranes”
- Airlines (international and domestic)
- International terminal

## Shopping in Kabul You can get everything you want

**The Kabul City Center,** next to the Shar-e-naw park, has some very smart shops.

**Roshan Plaza** has some quite respectable clothes shops.

**Chicken Street** is famed for its tourist fare (carpets, carvings, knives etc) and pirated CD/DVD's.

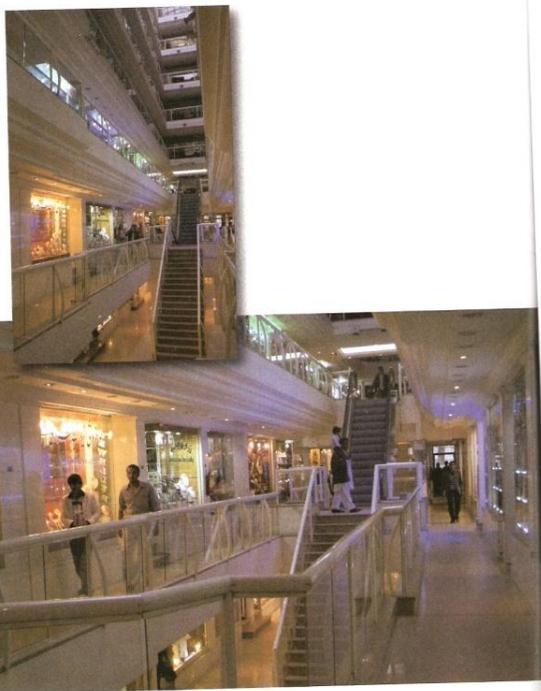

**Chelsea Supermarket** sells many types of western foods and products.

**Supreme Supermarket** on the Jalalabad road (near the British military base) has western products. A little further down the road is Ciano, an Italian commissary. There is frequently a security alert on the Jalalabad road.

**Spinneys** Wazir Akbar Khan, near British and German Embassy sell most western products and food.

**Shah M Book Co,** (across from Mustafa Hotel). The best bookstore in the city, it's the place to head for your next novel, and also has a good selection of coffee table books and books about Afghanistan. The owner was the subject for the recent book *The Bookseller of Kabul*. Prices are high, but you'll appreciate his selection.

Kabul City Center is Afghanistan's first modern-style indoor shopping mall that opened in 2005. It is approximately nine stories tall and is located in downtown Kabul. The mall is equipped with escalators and see-through elevators. The top six floors of the mall is part of the Safi Landmark Hotel.

## Kabul Sleep

### 1. Mustafa Hotel

Has a restaurant, internet cafe and billiards. Single rooms from \$30/night.

### 2. Salsal Guesthouse

Zarhona Maidan, Shar-e Naw Park, (located between the park and the Chelsea Supermarket, and is signed in English), +93 (0) 799 734 202.
