### OHA 220.1

### Museum and Medical Arts Service (MAMAS) Photographs

**Date of Records:** 1941-1945

**Size:** 7 linear, 20 boxes

**Finding aid:** arranged, inactive, unrestricted, many items digitized.

**Finding Aid:** By Eric W. Boyle (2013)

**Access and Use:** The Otis Historical Archives is committed to providing open access to its collections as far as possible within the limits of privacy and confidentiality. Some of the records may contain restricted material. Access to this collection is at the discretion of the Otis Historical Archives and material contained within the records may be subject to review before access is granted.

**Background Note:** The Museum and Medical Arts Services (MAMAS) was established in 1943 as a branch of the Medical Illustration Service, which was one of the divisions of the Army Medical Museum. They provided clinical photography, motion pictures, and provided medical illustrations for detachments in the overseas theaters during World War II. Their main purpose was to collect pictorial clinical data that would of scientific and training value and of historical value. They were organized units made up of an officer from the Sanitary Corps and six enlisted men. Each unit was equipped to function independently. They were trained to prepare and pack pathological material of medical and military interest to be sent back to the Museum. Units were dispatched to areas where the Army needed clinical data, particularly on tropical diseases, collected and illustrated for teaching purposes.

**Series/Scope and Content Note:** The collection consists of photographs taken by Museum photographers during World War II in Burma, China, India, New Guinea, Philippines, Australia, and Italy. Photographers included Melvin Shaffer and Frank Davis. The photographs collectively document a wide range of medical subjects encountered during the war, including illnesses and injuries suffered by soldiers and medical procedures and facilities designed and developed during wartime. Additional photos document camp life during the war. Some Japanese POW photographs from OHA 369 were accidentally separated out, but are reintegrated. Shaffer donated his personal copies to Southern Methodist University (see <http://digitalcollections.smu.edu/all/cul/hgp/>).

Boxes 001-016 contain mostly 4" x 5" photographs and negatives and in some cases include a record of when and where the image originated. Boxes 017-120 contain oversized photographs as well as 4" x 5" photographs that were originally part of notebooks arranged by subject.
