Introduction

The 2003 Child Health Care Survey of Department of Defense Beneficiaries (HCSDB) is the primary tool with which the TRICARE Management Activity (TMA) of the Assistant Secretary of Defense (Health Affairs) monitors parents' opinions concerning their child's experience in the military health system (MHS). The Child HCSDB is closely modeled to the Consumer Assessment of Health Plans Survey (CAHPS) 2.0H survey instrument so that findings for children in the MHS can be compared to the results of CAHPS surveys of privately insured children in the private sector. The Child HCSDB is intended to answer the following questions:

- How *satisfied* are sponsors of children in the MHS with their child's health care and their health plan?
- Does *access* for children at military and civilian facilities meet TRICARE standards?
- What aspects of MHS care contribute most to beneficiary satisfaction with their child's health care experiences? With which aspects are beneficiaries least satisfied?
- What are the demographic characteristics of children in the MHS and their sponsors?
- How do children in the MHS compare with children in the private sector on issues related to satisfaction and access to care?

The HCSDB is a mail survey of a representative sample of MHS beneficiaries. It is sponsored by the TRICARE Management Activity in the Office of the Assistant Secretary of Defense (Health Affairs) [OASD(HA)] under authority of the National Defense Authorization Act for Fiscal Year 1993 (P.L. 102-484). The DoD Defense Manpower Data Center (DMDC) prepared the sampling frame, which consists of selected variables for each MHS beneficiary in the Defense Enrollment Eligibility Reporting System (DEERS) database in February 2003. DEERS includes everyone who is eligible for a MHS benefit (i.e., everyone in the Uniformed Services—Army, Air Force, Navy, Marine Corps, Coast Guard, the Commissioned Corps of the Public Health Service, National Oceanic and Atmospheric Administration, Guard/Reserve personnel who are activated for more than 30 days—and other special categories of people who qualify for benefits). The frame includes those on active duty, those retired from military careers, immediate family members of people in the previous two categories, and surviving family members of people in these categories.

Mathematica Policy Research, Inc. (MPR, Washington, D.C.) prepared the sample of 35,000 child beneficiaries (Clusen and Friedman, 2003). National Research Corporation (NRC) fielded the survey between June and August 2003. MPR analyzed the survey data, reported on the results, and prepared this document, the "2003 Health Care Survey of DoD Beneficiaries: Child Technical Manual" under task order 14, under Contract Number 282-98-0021.

This manual is designed as a reference tool to be used by analysts as they interpret the survey findings and prepare briefings. The manual provides detailed documentation on the following: naming conventions for variables, editing procedures, selection of records, computation of response rates, recoding of variables, computation of weights, variance estimation, and construction of tables and charts for the report. The manual enables an analyst to follow, and

replicate if desired, the processing of the raw survey data through each step in the production of the final database.

A. OVERVIEW OF THE HCSDB

This section represents an overview of the methodology used in the survey. From the sample, 10,741 parents or sponsors of MHS beneficiaries younger than 18 years of age completed and returned a 2003 Child HCSDB questionnaire between July 3, 2003 and August 31, 2003.

1. Sample Design

The 2003 child sample design is based on three sample stratifications—enrollment status, geographic area, and age group. Enrollment type is defined by enrollment in TRICARE Prime with a military primary care manager (PCM), enrollment in TRICARE Prime with a civilian PCM, and not enrolled in TRICARE Prime. The effect of this stratification is to allocate a greater proportion of the sample to those enrolled in Prime and a smaller proportion to those not enrolled in Prime.

Geographic area refers to the beneficiary's regional assignment. The beneficiary's regional assignment is determined by the MTF that bears the financial responsibility for the beneficiary's health care. Only beneficiaries in the continental United States were included in the sample. Regions are combined into three "super regions". Regions are organized to reflect the relative maturity of TRICARE Prime in each region. The areas are referred to as *new regions*, where Prime is most recently implemented (Regions 1, 2, and 5); *mature regions*, where Prime was first implemented (Regions 6, 9-12, and 16); and *other regions* (Regions 3, 4, and 7/8).

Beneficiaries were assigned to one of three age groups: younger than 6 years old, between 6 and 12, and between 13 and 17 years old. Sampling procedures ensured that only one child per household was surveyed.

2. 2003 Child HCSDB

The HCSDB is an annual health care survey that was first fielded in 1995 for active duty military personnel, retirees, and their adult family members. In 1996 and 1997, the survey was expanded to include topics related to health care of children. In those years, the survey consisted of two separate questionnaires: Form A for adults and Form C for children's topics. The 1998 HCSDB did not include a child survey. In 2000, fielding of the child survey was resumed. The child survey assesses parents' satisfaction with their child's access to health care, TRICARE Prime, communication and customer service related to pediatric care. Note that prior to 2002, the title of the survey referred to the survey reference period. For example, the survey fielded in 2000 described children's experiences beginning in 1999 and was known as the 1999 Child HCSDB. Beginning in 2002, the survey title refers to the year the survey was fielded.

The 1999, 2000, 2002, and 2003 Child HCSDB were closely modeled on CAHPS 2.0H survey instruments so that findings for children in the MHS could be compared with the results of CAHPS surveys of privately insured children in the civilian sector. Most of the survey questions are identical to the CAHPS questions. CAHPS is a survey program sponsored by the Agency for Health Care Research and Quality (AHRQ), U.S. Department of Health and Human Services, and the Picker Institute. The program is designed to monitor the satisfaction and access of civilian health care plan beneficiaries. A few of the questions are "CAHPS-like" but are modified slightly to better fit the MHS context; some questions are unique to issues related to TRICARE.

The Child HCSDB covers the following topics:

- **Health Plan.** This section collects data on TRICARE Prime enrollment and the use of supplemental insurance and/or other private insurance by the child in the past 12 months.
- **Your Child's Personal Doctor or Nurse.** In this section, respondents are asked about their relationship with their child's personal doctor or nurse. They are asked to rate their child's personal doctor or nurse on a scale of 0 to 10 where 0 is the worst and 10 is the best. There are additional questions on problems receiving care from a TRICARE primary care manager.
- **Getting Health Care from a Specialist.** This section collects information about the child's need for and access to care from specialists. Respondents rate the specialist that their child sees most frequently on a scale from 0 to 10 where 0 is the worst and 10 is the best.
- **Your Child's Health Care in the Last 12 Months.** This section collects information on where children of DoD beneficiaries received most of their care in the past 12 months. These are questions on both military and civilian care. This section also contains questions about general and specific care at the facility the child used the most. These questions cover topics such as availability of providers and their staff, convenience, and courtesy and respect shown by providers and their staff. These questions are similar in content and format to questions in CAHPS.
- **Specialized Services.** In this section, parents are asked about requests for special medical equipment and therapy for their children. There are additional questions on how much of a problem it was to obtain these services.
- **Your Child's Health Plan.** This section is designed to measure beneficiaries' satisfaction with their child's primary health plan. Respondents are asked to rate their child's health plan on a scale of 0 to 10, where 0 is the worst and 10 is the best. Additionally, respondents are asked questions on problems with claims processing for their child, finding and understanding written materials from their child's health plan, customer service, processing paperwork, and resolving complaints.
- **Prescription Medications.** This section collects information on obtaining prescription medication for beneficiaries' children.
- **About Your Child and You.** This section collects demographic information about the child, including age, gender, and race. Respondents also report their age, gender, education level, and relationship to the child.

3. Survey Response

The survey was fielded by mail. Out of the initial sample of 35,000, NRC sent out 31,674 surveys during Wave 1 on July 3, 2003. The final mailing took place on August 7, 2003. Of these questionnaires, a total of 10,741 were returned either by mail or internet, for a response rate of 30.8 percent.

4. Database Development

MPR edited the data, selected the records for inclusion in the final database, and constructed variables to be used in the reports. To ensure that the survey data was representative of the DEERS population, MPR developed weights to take account of the initial sampling and the sampled individuals who chose not to respond to the survey.

5. Report

This year's results are presented in electronic HTML format on TMA's website at <http://www.TRICARE.USD.MIL>. In the 2003 Child TRICARE Consumer Report, results are

presented by enrollment group, age, and region. Results from this year's survey are compared to the civilian population using data from the national CAHPS Benchmarking Database (NCBD). Programming specifications used to create the Consumer Report using the 2003 Child HCSDB data are included as Appendix E.

B. ORGANIZATION OF THIS MANUAL

Chapter 2 presents the procedures used in fielding the survey. Chapter 3 explains how the database was developed. It covers naming conventions, editing procedures, record selection criteria, descriptions of all variable types, definitions of each constructed variable, and weighting procedures. Chapter 4 describes how the database was analyzed. The description includes rules for developing response rates, an explanation of the dependent variables and independent variables, and the methodology for estimating the variance of estimates. The manual concludes with a series of technical appendices:

- Appendix A: Annotated questionnaire
- Appendix B: Materials sent to the respondents during the fielding of the survey
- Appendix C: Data Processing Architecture
- Appendix D: Plan for Data Quality – Coding Scheme
- Appendix E: SAS Code for Child TRICARE Consumer Report
- Appendix F: Web Specifications for Child TRICARE Consumer Report
- Appendix G: SAS Code for Database Construction
- Appendix H: The SUDAAN code for calculating variance of estimates

Chapter
2

Survey of Children

This chapter presents information on the survey administration cycle for the 2003 Child Health Care Survey of DoD Beneficiaries (HCSDB), with specific details on the survey mailing cycle and the number of surveys received. Those who received the mailing were given the option of responding on the internet instead of by mail. This chapter describes the mailings and the surveys received by mail. Both mail and internet responses are included in the dataset, frequency tables and response rate calculations.

A. SURVEY OPERATIONS ACTIVITIES

The operational support for mailing the survey involved four mailings to beneficiaries between June 3, 2003 and August 7, 2003. Targeted mailings and remailings have been integrated into the mailing administration in order to increase response rates. The mailings are as follows: notification letter, first survey mailing, reminder/thank you post card, and second survey mailing. The notification letter was a short letter of explanation encouraging beneficiaries to participate. The first and second surveys were mailed with a cover letter of explanation. The reminder/thank you post card was mailed between the first and second surveys reminding beneficiaries to complete the survey and thanking those beneficiaries who had completed the survey. All mailing pieces were addressed to the parent or guardian of the beneficiary. Examples of these are available in Appendix B. All mailings have been completed. The field period closed on September 2, 2003.

B. ADDRESS UPDATE ACTIVITIES PRIOR TO AND DURING SURVEY ADMINISTRATION

The sample file was received from Mathematica Policy Research (MPR) on May 20, 2003. The file contained 35,000 records of DoD beneficiaries and 69 variables constructed from the Defense Enrollment Eligibility Reporting System (DEERS). The file was sent to an NCOA vendor for address updating on May 20, 2003. National Research Corporation (NRC) sent a copy of all sample records to an outside vendor to receive address hygiene services and to be interfaced with the National Change of Address (NCOA) database to obtain updated address information. The NCOA vendor returned the updated address file and this information, along with the sample file from MPR, were loaded into NRC's proprietary software system known as Qualysis. Qualysis is NRC's "quality process" software and business discipline that standardizes and automates the entire survey process from data quality checks to the scanning of returned surveys.

The Configuration Manager module in Qualysis contains the layout for all mail items (e.g., the survey, cover letters, thank you/reminder postcards), mail methodology, and cover letter personalization. For the notification letter mailing step, the address provided by the NCOA vendor was utilized when available. Records that were not updated by the NCOA vendor were mailed to one of the three DEERS addresses: residential address, sponsor address, and unit address. When possible, the residential address was given preference over the sponsor address and likewise the sponsor address was given preference over the unit address. When all records had

been assigned an address for the notification letter mailing step, Qualysis began generating the personalized letters. The notification letter was mailed on June 3, 2003.

The updating of addresses is a continuous process throughout the survey administration cycle. During survey administration, address updates are obtained from multiple sources:

- Self report by beneficiaries (via telephone, voice mail, or fax).
- Address correction information from the United States Postal Service (USPS).
- Out of date forwarding address information from the USPS.
- Mail items returned by the USPS as non-deliverable.

Updated address information was added to Qualysis through the use of the DoD Beneficiary Update System (DoDBUS), an interface created by NRC developers to allow new address information to be entered into Qualysis and to track changes when using the DEERS supplied addresses.

Address information received directly from the beneficiary was considered the most accurate and was the first address used whenever possible. Beneficiaries were provided with toll free telephone and toll free fax phone numbers and voice mail option to use in order to update their addresses. Collect calls were also available if a beneficiary could not access the toll free telephone number. The telephone and fax numbers were printed on the notification letter, the reminder/thank you card, and the cover letter that accompanied the first survey.

The United States Postal Service also provided address update information in the form of Address Correction Services. This service is accessed by the use of the "Address Service Requested" indicia on the notification letter and the outer envelopes of the first and second surveys. Many post offices returned updated address information on diskettes, which are loaded, into Qualysis. Post offices that did not have access to this technology returned copies of the mail piece with the old and new addresses provided. This information was entered into Qualysis through the DoDBUS.

The DoDBUS also provided the interface to enter non-deliverable mail pieces and mark the address used for that mail step as invalid. If other addresses were available, the DoDBUS operator would choose the next available address for the next mail step. When all addresses had been exhausted, the record was marked as a "final non-deliverable" and no further mailings were attempted. Second surveys that were returned as non-deliverable were also marked as "final non-deliverables" as it was the final mail step in this methodology.

Based on data from the final returns data set, a total of 524 beneficiaries did not have sufficient addresses information and were not included in any of the mail steps. The remaining beneficiaries were mailed the notification letter. Prior to mailing the first survey, NRC removed any beneficiaries who were marked as "final non-deliverable" or any beneficiary who contacted NRC and refused to participate or was found to be ineligible. First surveys were mailed on July 3, 2003. The reminder/thank you card was mailed on July 17, 2003. The reminder card was sent to all beneficiaries who received the first survey, with the exception of those beneficiaries whose first survey was returned and their record marked as "final non-deliverable". Second surveys were mailed on August 7, 2003. Second surveys were mailed to all beneficiaries who did not return a first survey and whose records had not been marked as "final non-deliverable".

Table 2.1 summarizes address sources by each of the four beneficiary categories. This table shows the source of the last address used in sending a mailing piece to a beneficiary. Table 2.1 shows that DEERS-supplied addresses were used 83% of the time.

TABLE 2.1
 FREQUENCY OF ADDRESS SOURCE BY BENEFICIARY CATEGORY
 (N = 35,000)

	Active Duty	Active Duty Dependents	Retirees and Family Members < 65	Retirees and Family Members > 65	Total
No valid address (disqualified after NCOA)	1 0.00%	4 0.01%	16 0.05%	0 0.00%	21 0.06%
Bad Address (disqualified by postal cleaning software)	2 0.01%	397 1.13%	143 0.41%	0 0.00%	542 1.55%
Phone call/Voice mail	0 0.00%	36 0.10%	16 0.05%	0 0.00%	52 0.15%
ACR	0 0.00%	1,841 5.26%	327 0.93%	0 0.00%	2,168 6.19%
Fax	0 0.00%	7 0.02%	9 0.03%	0 0.00%	16 0.05%
NCOA	2 0.01%	2,132 6.09%	1,055 3.01%	0 0.00%	1,489 9.11%
DEERS Unit	12 0.03%	0 0.00%	0 0.00%	0 0.00%	12 0.03%
DEERS Residential	13 0.04%	19,262 55.03%	9,551 27.29%	0 0.00%	28,826 82.36%
DEERS Sponsor	0 0.00%	78 0.22%	92 0.26%	0 0.00%	170 0.49%
ODF	0 0.00%	0 0.00%	0 0.00%	0 0.00%	0 0.00%
Electronic ACR	0 0.00%	3 0.01%	1 0.00%	0 0.00%	4 0.01%
Total	30 0.09%	23,760 67.89%	11,210 32.03%	0 0.00%	35,000 100.00%

Table 2.2 summarizes the address sources for returned surveys included in the 2003 Child HCSDDB data file. The data shows that 86% of the returned surveys were mailed to the residential beneficiary address supplied by DEERS.

TABLE 2.2
FREQUENCY OF ADDRESS SOURCES FOR RETURNED SURVEYS
(N = 9,898)

Address Type	Frequency (n)	Percent of Returns
DEERS Residential	8,532	86.2%
DEERS Sponsor	34	0.3%
DEERS Unit	0	0.0%
Phone/Voice Mail	27	0.3%
NCOA	906	9.2%
Fax	9	0.1%
ACR & ODF	390	3.9%
Electronic ACR	0	0.0%
Total	9,898	100.0%

Note: If beneficiaries returned more than one completed survey, both surveys were included in the numbers in Table 2.2.

C. LETTER PROCESSING PROCEDURES

A vital component to effective management and monitoring of the data collection process is the Survey Control System (SCS). The SCS ensures that data are accurate, integrated, and available during all phases of the survey administration. NRC's unique identifier known as a "lithocode" links all records in the SCS to the original sample file. The lithocode is a unique identification number assigned by Qualysis at the time that letters or surveys are generated. A new lithocode number is created for each mail step. These lithocodes are stored for each beneficiary in a table in the SCS. This allows NRC staff to determine whether a returned survey is a first or second survey and to identify instances where a beneficiary may return both the first and second survey. The lithocode also allows the surveys to be monitored without use of a beneficiary's social security number or other information that could identify the beneficiary. Lithocodes are used to identify the beneficiary when returned surveys are scanned, whenever beneficiaries are removed from future mailings due to refusal/ineligibility or no valid address, and when addresses are updated or changed in DoDBUS.

D. SURVEY ADMINISTRATION TIMELINE

The HCSDDB mailing process was designed so that each beneficiary with a usable address could receive up to four documents: a notification letter, a first survey, a reminder/thank you card, and a second survey. If a beneficiary returned a first survey, a second survey was not sent. If a beneficiary identified themselves as refusing to participate or as ineligible, they were removed from future mail steps as well. Beneficiaries who were marked as "final non-deliverable" were also removed from future mail steps.

A total of 34,476 notification letters were mailed on June 3, 2003. Immediately following this mailing, NRC staff began entering address changes and updating records to indicate beneficiaries who identified themselves as refusing to participate or as ineligible to participate. There were 2,661

records marked as “final non-deliverable” and 141 records marked as refused/ineligible prior to mailing the first survey. The survey is a 12-page booklet accompanied by a cover letter of explanation and a postage paid return envelope. A total of 31,674 first surveys were mailed to beneficiaries on July 3, 2003.

The reminder/thank you card was sent to 28,425 beneficiaries on July 17, 2003. The number of reminder/thank you cards was reduced by 3,249 due to “final non-deliverables” received prior to mailing.

The second survey was mailed to 24,786 beneficiaries on August 7, 2003. This number was reduced by 521 records marked as “final non-deliverables”, 58 records marked as refused/ineligible, and 3,060 records marked due to beneficiaries who returned the first survey.

Prior to the mailing of the first survey, 20 questionnaires were completed by NRC staff and scanned into the SCS. A data set file was created and copies of the questionnaires were sent to the analysis contractor to determine if the file was readable and scanned correctly.

Table 2.3 summarizes the HCSDB mailings. Data includes the date of each mail step, the quantity mailed in each step, and the number of records that were removed prior to the next mail step.

TABLE 2.3
MAILING TIMELINE

Mail Step	Action	Records Removed	Sample
	Total Sample Size		35,000
	Subtract no address	126	
	Subtract bad address	398	
	Total: beneficiaries not receiving a pre note		-524
Notification Letter	Mailed on 06/3/03		34,476
	Subtract PND	2,661	
	Subtract ineligible/refused	141	
	Total		-2,802
First Survey	Mailed on 07/3/03		31,674
	Subtract PND	3,249	
	Total		-3,249
Reminder/Thank You Post Card	Mailed on 07/17/03		28,425
	Subtract PND	521	
	Subtract ineligible/refused	58	
	Subtract 1st Surveys received	3,060	
	Total		-3,639
Second Survey	Mailed on 08/7/03		24,786

E. PROCESSING AND CLASSIFICATION OF INCOMING SURVEYS

Returned surveys were visually checked for any written comments prior to scanning. Refusal or ineligibility comments were entered into Qualysis using the DoDBUS. Any other comments were referred to the Account Director to be forwarded to the DoD Task Manager.

Each morning, NRC staff open non-deliverables and update address changes or "final non-deliverable" status for each record. Surveys are scanned using software called FAQSS. The Scanner Interface module of Qualysis receives the information from FAQSS and identifies the beneficiary and their responses to the survey questions.

Surveys must be imported from the Qualysis directory into the FAQSS System by running a "create text definitions files" from the scanner interface application. During the import process, the surveys are run through three passes. In the first pass, the lithocode is read. Any unread lithocodes are manually entered. The system then creates a lithocode list. From the complete lithocode list, Qualysis exports the text definition files to match the lithocodes. Lastly, FAQSS separates the files into batches and moves them into the processing queue.

The next step in scanning is batch processing. This template is used by the processor to find response areas and to read the responses as valid or spurious. If the system is not 99 percent certain of a response, it is sent to a data editing workstation.

Any questionable marks as detected by the processor are brought up at the data editing station for review by an editor. The editor decides if the mark is a valid response and enters the appropriate system instructions. If the editor is unable to determine the response, a "non-response" instruction is entered. From scanner interface, a transfer results application is applied which moves the scanning files into the Qualysis database and logs the transaction. A final check is then performed to ensure that all surveys have been entered in the Qualysis database.

Throughout the administration of HCSDB, all records are marked with a final disposition code known as FLAG_FIN. Some records (such as no valid addresses) can be marked prior to the first mail step. Other records cannot be marked until all mail steps have been completed. The FLAG_FIN variables and their descriptions are

FLAG	COMMENT
FLAG_FIN=1	Returned survey – survey was completed and returned.
FLAG_FIN=2	Returned ineligible – survey was returned with at least one question marked and information that the beneficiary was ineligible. The information indicating ineligibility may have come by phone, fax, or the survey itself.
FLAG_FIN=3	Returned blank – temporarily ill or incapacitated. Survey was returned blank along with information that the beneficiary was temporarily ill or incapacitated. These sample members were eligible.
FLAG_FIN=4	Returned blank – deceased. Survey was returned blank along with information that the beneficiary was deceased. These sample members were ineligible.
FLAG_FIN=5	Returned blank – incarcerated or permanently incapacitated. Survey was returned blank along with information that the beneficiary was incarcerated or permanently hospitalized. These sample members were ineligible.

FLAG	COMMENT
FLAG_FIN=6	Returned blank – left military or divorced after 01/31/03, retired. Survey was returned blank along with information that the beneficiary left the military after 01/31/03, divorced after 01/31/03, or retired. These sample members were eligible.
FLAG_FIN=7	Returned blank – not eligible on 01/31/03. Survey was returned blank along with information that the beneficiary was not eligible for Military Health System Plan on 01/31/03. These sample members were ineligible.
FLAG_FIN=8	Returned blank – other eligible. Survey was returned blank along with a reason given by the sample member. These sample members were eligible.
FLAG_FIN=9	Returned blank – no reason. Survey was returned blank without an explanation. These sample members were eligible.
FLAG_FIN=10	No return – temporarily ill or incapacitated. Survey was not returned and beneficiary was temporarily ill or incapacitated. These sample members were eligible.
FLAG_FIN=11	No return – active refuser. Survey was not returned and beneficiary refused to take part in the survey. These sample members were eligible.
FLAG_FIN=12	No return – deceased. Survey was not returned and beneficiary deceased. These sample members were ineligible.
FLAG_FIN=13	No return – incarcerated or permanently incapacitated. Survey was not returned, beneficiary was incarcerated or permanently hospitalized. These sample members were ineligible.
FLAG_FIN=14	No return – left military or divorced after 01/31/03, retired. Survey was not returned, beneficiary left service after 01/31/03, divorced after 01/31/03, or retired. These sample members were eligible.
FLAG_FIN=15	No return – not eligible on 01/31/03. Survey was not returned, beneficiary was not eligible for Military Health System Plan on 01/31/03. These sample members were ineligible.
FLAG_FIN=16	No return – other eligible. Survey was not returned, beneficiary gave other reason for not completing the survey. These sample members were eligible.
FLAG_FIN=17	No return – no reason. Survey was not returned, beneficiary gave no reason.
FLAG_FIN=18	PND – no address remaining. All addresses were attempted, mailing was returned PND.
FLAG_FIN=19	PND – address remaining at the close of field. At the close of field, the last address used was found invalid, next available was not attempted.
FLAG_FIN=20	Original Non-Locatable – no address at start of mailing. Substantially incomplete or blank address field before the survey was administered, no mailings attempted.

FLAG	COMMENT
FLAG_FIN=21	Beneficiary provides written documentation declining to participate but doesn't specify a reason.
FLAG_FIN=22	Beneficiary indicates they are hospitalized but without providing any way to determine whether incapacity is temporary or permanent. Therefore, eligibility determination can not be made.
FLAG_FIN=23	Returned blank – deployed. Survey was returned blank along with information that the beneficiary was deployed.
FLAG_FIN=24	No return – deployed. Survey was not returned, beneficiary was deployed.

Table 2.4 documents the final disposition of the survey sample by each beneficiary group. The ENBGSMPL variable was used to create the beneficiary groups. The ENBGSMPL variable has values 1-10. The value of 1 is = Active Duty; values of 2, 3, & 4 = Active Duty Dependents, values of 5, 6, & 7 = Retired and Family Members < 65; and values of 8, 9, & 10 = Retired and Family Members > 65.

*Please note that the active duty beneficiaries are 17 years of age and appear to be active duty or in the guard/reserves.

TABLE 2.4

FREQUENCY (N) AND PERCENT DISTRIBUTION OF FINAL DISPOSITION OF SURVEY SAMPLE BY BENEFICIARY

Final Survey Disposition	Active Duty	Active Duty Dependents	Retirees and Family Members < 65	Retirees and Family Members > 65	Total
Returned non blank survey	1 0.00%	5,139 14.68%	3,488 9.97%	0 0.00%	8,628 24.65%
Returned - ineligible	0 0.00%	0 0.00%	0 0.00%	0 0.00%	0 0.00%
Blank - temp ill or incapacitated	0 0.00%	0 0.00%	0 0.00%	0 0.00%	0 0.00%
Blank - deceased	0 0.00%	0 0.00%	0 0.00%	0 0.00%	0 0.00%
Blank - incarcerated or perm incapacitated	0 0.00%	0 0.00%	0 0.00%	0 0.00%	0 0.00%
Blank - left military or divorced after 01/31/03	0 0.00%	0 0.00%	0 0.00%	0 0.00%	0 0.00%
Blank - not eligible for MHS on 01/31/03	0 0.00%	1 0.00%	0 0.00%	0 0.00%	1 0.00%
Blank - other eligible	0 0.00%	0 0.00%	0 0.00%	0 0.00%	0 0.00%
Blank - no reason	0 0.00%	24 0.07%	13 0.04%	0 0.00%	37 0.11%

No return - deployed	0 0.00%	4 0.01%	0 0.00%	0 0.00%	4 0.01%
Total	30 0.09%	23,760 67.89%	11,210 32.03%	0 0.00%	35,000 100.00%

Note: This table does not include duplicate surveys.

The data in Table 2.5 displays the number of first and second surveys returned.

TABLE 2.5
RETURNED SURVEYS BY SURVEY TYPE

Survey Indicator	First Survey	Second Survey	Total
Returned non-blank survey	5,398 54.54%	4,415 44.60%	9,813 99.14%
Returned non-blank duplicate survey	0 0.00%	85 0.86%	85 0.86%
Total	5,398 54.54%	4,500 45.46%	9,898 100.00%

Note: This table includes duplicate surveys.

Chapter

3

Database

This chapter explains the process of developing the raw survey data into a final database free of inconsistencies and ready for analysis. We discuss the design of the database; cleaning, editing, and implementing the Coding Scheme; record selection; and constructing variables.

A. DATABASE DESIGN

The 2003 Child HCSDB consists of variables from various sources. When NRC delivered the file to MPR after fielding the sample, the following types of variables were present:

- DEERS information on beneficiary group, social security number, sex, age, etc.
- Sampling variables used to place beneficiaries in appropriate strata
- Questionnaire responses
- NRC information from fielding the sample, such as scan date and flags developed during the fielding to assist us in determining eligibility

MPR added the following types of variables to the database:

- Updated DEERS variables from the time of data collection to be used for post-stratification
- Coding Scheme flags
- Constructed variables for analysis
- Weights

In addition, MPR updated and cleaned the questionnaire responses using the Coding Scheme tables found in Appendix D. This year the final file does not include both the original and recoded responses, but only the cleaned responses; this will help users to avoid using an uncleaned response for analysis. We structured the final database so that all variables from a particular source are grouped by position. Table 3.1 lists all variables in the database by source and briefly describes each variable. For specific information on variable location within the database, refer to the “2003 Health Care Survey of DoD Beneficiaries: Child Codebook and User’s Guide.”

1. Data Sources

a. DEERS

The sampling frame was provided to MPR prior to the selection of the sample. DEERS information such as sex, date of birth, and service are retained in the database; this data is current as of the time of sample selection.

b. Sampling Variables

MPR developed variables during the sample selection procedure that were instrumental in placing beneficiaries in appropriate strata. Many of the variables are retained on the database.

c. Questionnaire Responses

These variables represent the cleaned values for all responses to the questionnaire. The original values scanned in by NRC are cleaned and recoded as necessary to ensure that responses are consistent throughout the questionnaire. The Coding Scheme tables found in Appendix D are the basis for insuring data quality.

d. Survey Fielding Variables

In the process of fielding the survey, NRC created a number of variables that we retain in the database. Certain of these variables, information that came in by phone, for example, assist us in determining eligibility.

e. Coding Scheme Flags

Each table of the Coding Scheme (see Appendix D) has a flag associated with it that indicates the pattern of original responses and any recodes that were done. For example, the table for Note 5 has a flag N5.

f. Constructed Variables

MPR constructed additional variables that were used in the child report cards. Often these variables were regroupings of questionnaire responses or the creation of a binary variable to indicate whether or not a TRICARE standard was met. Complete information on each constructed variable is found in section 3.D.

g. Weights

MPR developed weights for each record in the final database. Weights are required for the following reasons:

- To compensate for variable probabilities of selection
- To adjust for differential response rates
- To improve the precision of survey-based estimates through post-stratification

Weighting procedures are discussed in section 3.E.

TABLE 3.1

VARIABLES IN THE 2003 CHILD HCSDB DATA FILE

SAMPLING VARIABLES	
MPCSMPL	- MPCSMPL - Military Personnel Category
MPRID	- Unique MPR Identifier
SEXSMPL	- SEXSMPL - Sex
SVCSMPL	- SVCSMPL - Branch of Service
AGESMPL	- AGESMPL - Age
BGCSMPL	- BGCSMPL - Beneficiary Group.....
REGSMPL	- REGSMPL - Region
ENBGSMPL	- Enrollment by beneficiary category
STRATUM	- Sampling STRATUM.....
E1	- Eligibility indicator for period = 1
E2	- Eligibility indicator for period = 2
E3	- Eligibility indicator for period = 3
DEERS VARIABLES	
MRTLSTAT	- Marital Status
SUPREG	- SUPREG - Super Region
DAGEQY	- Age (As of 28 February 2002)
FIELDAGE	- Age (As of 1 July 2002)
PCM	- Primary Manager Code (CIV or MIL)
RACEETHN	- Race/Ethnic Code
DBENCAT	- Beneficiary Category
LEGDDSCD	- DDS Code
MBRRELCD	- Member Relationship Code.....
PNLCATCD	- Personnel Category Code (Duty Status).....
DMEDELG	- Medical Privilege Code
DSPONSVC	- Derived Sponsor Branch of Service
MEDTYPE	- Medicare Type.....
PATCAT	- Aggregated Beneficiary Category
ENRID	- Enrollment DMISID.....
DCATCH	- Catchment Area
ULOCDMIS	- Unit DMISID
DHSRGN	- Health Service Region
POST STRATIFICATION	
ENLSMPL	- ENLSMPL - Enrollment Sampling Group
FNSTATUS	- Final Status
KEYCOUNT	- # of Key Questions Answered.....
POSTSTR	- Post Stratification Cell
QUESTIONNAIRE RESPONSES	
C03001	- Are you adult responsible for child
C03002	- Which hlth plan did you use most
C03003	- Last 12 mnths:# months in a row child enrolled in health plan
C03004A	- Child covered by TRICARE Prime
C03004B	- Child covered by TRICARE Extra/Standard
C03004C	- Child covered by Civilian HMO
C03004D	- Child covered by Other Civilian Insurance
C03004E	- Child covered by Medicaid
C03004F	- Child covered by Uniform Services Family Health Plan(USFHP)
C03004G	- Child covered by Federal Employee Health Benefit Program(FEHBP)
C03004H	- Not sure who Child is covered by.....
C03004I	- Child did not use health plan last 12 months
C03005	- Child get new personal Dr/Nurse since joining health plan
C03006	- How much problem to get personal Dr/Nurse.....
C03007	- Does child have personal Dr/Nurse

- C03008 - Last 12 mnths:Times child visited personal Dr/Nurse in office/clinic
- C03009 - Talk about feeling/growing/behaving.....
- C03010 - Child has medical/behavioral/other condition lasting >3mnths
- C03011 - Dr understands med/behvrl/otr cndtn's effect on child's daily life
- C03012 - Dr understands med/behvrl/otr cndtn's effect on family's daily life
- C03013 - Rating of child's personal Dr/Nurse.....
- C03014 - Does child have primary care manager
- C03015 - Know name of child's Primary care mgr.....
- C03016 - In last 12 mos how much prblm to see PCM
- C03017 - Is primary care mgr military or civilian.....
- C03018 - Did you think child needed to see splst.....
- C03019 - How much problem to get referral to specialist that child needed to see
- C03020 - In last 12 mos did child see specialist.....
- C03021 - Rating of specialist seen most often
- C03022 - Specialist same as personal Dr.....
- C03023 - Call during reg. Hrs to get help/advice
- C03024 - Called during reg Hrs did you get hlp.....
- C03025 - Make appt for regular/routine hlthcre
- C03026 - How oftn child got apptmnt for regular/routine care as soon as wanted.....
- C03027 - Days child waited between making apptmnt and seeing provider
- C03028 - Last 12 mnths:Child need appointment for well-patient care.....
- C03029 - Get appt for well-patient care as soon as you wanted
- C03030 - Days child waited between making apptmnt and seeing well-patnt care provider.....
- C03031 - Have illness/injury need care right away.....
- C03032 - Get needed care as soon as wanted
- C03033 - Wait btwn trying to & seeing provider.....
- C03034 - Times to ER.....
- C03035 - Times to Dr office/Clinic (excluding ER)
- C03036 - Problem to get necessary care
- C03037 - Problem wait for approval
- C03038 - How oftn wait >15 mins
- C03039 - How oftn staff treat w/courtesy &respect
- C03040 - How oftn were staff helpful.....
- C03041 - How oftn did staff listen carefully.....
- C03042 - How oftn did staff explain things to you
- C03043 - How oftn staff respect what had to say
- C03044 - Child able to talk to Dr
- C03045 - Dr explain in way for child to undrstnd
- C03046 - How oftn spend enough time w/child
- C03047 - Have questions about child's health or health care?
- C03048 - How oftn child's Dr made it easy to discuss concerns
- C03049 - How oftn you got specific info needed from child's Dr
- C03050 - How oftn you had your questions answered by child's Dr
- C03051 - Were any decisions made about your child's health care.....
- C03052 - How oftn child's Dr offer you choices about child's health care
- C03053 - How oftn child's Dr discuss good and bad of diffrent choices.....
- C03054 - How oftn child's Dr ask you to tell them what choice you prefer.....
- C03055 - How oftn child's Dr involved you when decisions were made.....
- C03056 - Rating of child's healthcare
- C03057 - Type of facility child used most often
- C03058 - Child enrolled in any kind of school or daycare
- C03059 - Needed child's Dr to contact school about child's health
- C03060 - Got help needed from child's Dr in contacting child's school.....
- C03061 - Got special medical devices for child: eg walker, oxygen equipmnt.....
- C03062 - Problem getting special medical equipment for child.....
- C03063 - Someone from health plan/Dr's office helped get special med equipment....

C03064	- Got special therapy for child: eg physcl, occuptnl, spch therapy
C03065	- Problem getting special therapy for child
C03066	- Someone from health plan/Dr's office helped get special therapy for child ...
C03067	- Got treatmnt/cnselling for child's emotnl/develpmnt/behavrl prblm.....
C03068	- Problem getting treatment or counseling for child.....
C03069	- Someone from health plan/Dr's office helped get treatmnt/counseling.....
C03070	- Child got care from more than one kind of health care provider
C03071	- Someone from hlth plan/Dr's offc helped coordnt chld's care frm dif srvcv ...
C03072	- Send in any claims
C03073	- Handle claim in reasonable time
C03074	- Handle claim correctly
C03075	- Plan make clear how much to pay
C03076	- Look for info/written material
C03077	- Find/understand info in written material
C03078	- Call customer service to get info
C03079	- Problem get help when call customer svc.....
C03080	- Called/written plan with complaint.....
C03081	- How long to resolve complaint
C03082	- Complaint/problem settled to satisfctio
C03083	- Experience with paperwork
C03084	- Problem with paperwork.....
C03085	- Rating of exprience with child hlth plan.....
C03086	- Child get prescripton or you refilled childs prescription.....
C03087	- Problem getting child's prescription medicine
C03088	- Someone from health plan/Dr's office helped get child's prescription
C03089	- Rate child's overall health
C03090	- Child use medicine prescribed by Dr
C03091	- Medicine b/c medical,behavioral,other.....
C03092	- Medicine b/c cndtn expected last>=12 mos
C03093	- Child needs/uses more medical,mntl,eductnl services than is usual.....
C03094	- Use services b/c of medical/behavioral/otr health condition
C03095	- Svcs b/c condition expected last>=12 mos.....
C03096	- Limited/prevented in ability.....
C03097	- Limited b/c medical, behavioral, other.....
C03098	- Limited b/c condition expected last>=1yr
C03099	- Get special therapy
C03100	- Therapy b/c medical, behavioral, other
C03101	- Therapy b/c condition expected last>=1yr
C03102	- Problem for which gets trtmnt/counseling
C03103	- Trtmnt/counseling b/c conditn last>=1yr
C03104	- Is child male or female
C03105	- Is child Hispanic/Latino
C03106A	- Child race: White
C03106B	- Child race: Black
C03106C	- Child race: Asian
C03106D	- Child race: Native Hawaiian/Pacific Islander
C03106E	- Child race: Am. Indian/Alaskan
C03106F	- Child race: Other
C03107	- Your age now
C03108	- Are you male or female
C03109	- Highest grade/level you completed
C03110	- How are you related to the policy holder.....
C03111	- How related to child.....

NRC SURVEY FIELDING VARIABLES

FLAG_FIN	- Final Disposition
DUPFLAG	- Multiple Response Indicator.....
N1A	- Coding Scheme Note 1A.....

N2	- Coding Scheme Note 2
N2A	- Coding Scheme Note 2A.....
N2B	- Coding Scheme Note 2B.....
N3	- Coding Scheme Note 3
N4A	- Coding Scheme Note 4A.....
N4B	- Coding Scheme Note 4B.....
N5	- Coding Scheme Note 5
N6	- Coding Scheme Note 6
N7	- Coding Scheme Note 7
N8	- Coding scheme Note 8.....
N10	- Coding Scheme Note 10
N10A	- Coding Scheme Note 10A.....
N9	- Coding scheme Note 9.....

N15	- Coding Scheme Note 15
N15A	- Coding Scheme Note 15A.....
N16A	- Coding Scheme Note 16A.....
N17A	- Coding Scheme Note 17A.....
N18A	- Coding Scheme Note 18A.....
MISS_1	- Count of: Violates Skip Pattern
MISS_4	- Count of: Incomplete grid error
N19A	- Coding Scheme Note 19A.....
N20	- Coding Scheme Note 20
MISS_5	- Count of: Don't know or not sure.....
MISS_6	- Count of: Not applicable - valid skip.....
MISS_7	- Count of: Out-of-range error.....
MISS_8	- Count of: Multiple response error.....
MISS_9	- Count of: No response - invalid skip
MISS_TOT	- Total number of missing responses

CONSTRUCTED VARIABLES

CONUS	- CONUS - CONUS/OCONUS Indicator
XENR_PCM	- Enrollment by PCM type
XENRLLMT	- Enrollment in TRICARE Prime
XINS_COV	- Insurance Coverage
KCIVWAT1	- Wait <4 wks for well patient visit-Civ
KMILOFFC	- Office wait of more than 15 minutes-Mil.....
KMILWAT1	- Wait <4 wks for well patient visit-Mil
XBNFGRP	- Constructed Beneficiary Group
KBGPRB1	- Big problem getting referrals to spclst.....
KBGPRB2	- Big problem getting necessary care.....
KCIVOFFC	- Office wait of more than 15 minutes-Civ
KMILOP	- Outpatient visits to Military facility

WEIGHTS

BWT	- BWT - Basic Sampling Weight
KCIVINS	- Beneficiary covered by civilian insurance
KCIVOP	- Outpatient visits to Civilian facility
ADJWT	- ADJWT - Adjusted Weight
POP	- DEERS population by CELLNAME for weights

WRWT	- Final Weight
WRWT1	- Replicated/JackKnife Weight 1
WRWT2	- Replicated/JackKnife Weight 2
WRWT3	- Replicated/JackKnife Weight 3
WRWT4	- Replicated/JackKnife Weight 4
WRWT5	- Replicated/JackKnife Weight 5

2. Variable Naming Conventions

To preserve continuity with survey data from previous years, MPR followed the same variable naming conventions used for the 1999, 2000, and 2002 Child survey data. Variable naming conventions for the 2003 Child HCSDb are shown in Table 3.2. The public use files for the child survey will contain only recoded variables.

TABLE 3.2

NAMING CONVENTIONS FOR 2003 CHILD HCSDb VARIABLES
(VARIABLES REPRESENTING SURVEY QUESTIONS)

1 st Character: Survey Type	2 nd – 3 rd Characters: Survey Year	4 th – 6 th Characters: Question #	Additional Characters: Additional Information
C= Health Beneficiaries (17 and Younger, child questionnaire)	03	001 to 111	A to I are used to label responses associated with a multiple response question

(CONSTRUCTED VARIABLES)

1 st Characters: Variable Group	Additional Characters: Additional Information
N=Coding scheme notes	Number referring to Note, e.g., N2
X=Constructed independent variable	Descriptive text, e.g., XENRLLMT
K=Constructed dependent variables	Descriptive text, e.g., KMILOP (total number of outpatient visits to military facility)

3. Missing Value Conventions

The 2003 conventions for missing variables are the same as the 2003 Adult HCSDb conventions. All missing value conventions used in the 2003 HCSDb are shown in Table 3.3

TABLE 3.3
CODING OF MISSING DATA AND “NOT APPLICABLE” RESPONSES

ASCII or Raw Source Data	Edited and Cleaned SAS Data	Description
Numeric	Numeric	
-9	.	No response
-8	.A	Multiple response error
-7	.O	Out of range error
-6	.N	Not applicable or valid skip
-5	.D	Scalable response of “Don’t know” or “Not sure”
-4	.I	Incomplete grid error
-1	.C	Question should have been skipped, not answered

B. CLEANING AND EDITING

Data cleaning and editing procedures ensure that the data are free of inconsistencies and errors. Standard edit checks include the following:

- Checks for multiple surveys returned for any one person
- Checks for multiple responses to any question that should have one response
- Range checks for appropriate values within a single question
- Logic checks for consistent responses throughout the questionnaire

We computed frequencies and cross tabulations of values at various stages in the process to verify the accuracy of the data. Data editing and cleaning proceeded in the following way:

1. Scan Review

NRC spot checked the scanned results from the original survey to verify the accuracy of the scanning process and made any necessary corrections by viewing the returned survey.

2. Additional NRC Editing and Coding

- In preparing the database for MPR, NRC used variable names and response values provided by MPR in the annotated questionnaire (see Appendix A). NRC delivered to MPR a database in SAS format. In this database, any questions with no response were encoded with a SAS missing value code of '.'. Also, as part of the scanning procedure, NRC entered the SAS missing value of '.A' for any question with multiple responses where a single response was required.

3. Duplicate or Multiple Surveys

At this stage, NRC delivered to MPR a file containing one record for every beneficiary in the sample, plus additional records for every duplicate survey or multiple surveys received from any beneficiary. These duplicates and multiples were eliminated during record selection, and only the most complete questionnaire in the group was retained in the final database. Record selection is discussed in Section 3.C.

4. Removal of Sensitive or Confidential Information

The file that MPR received from NRC contained sensitive information such as social security number (SSN). Any confidential information was removed from the file. Each beneficiary had already been given a generic ID (MPRID) substitute during sample selection, the MPRID was retained as a means to uniquely identify each individual.

5. Initial Frequencies

MPR computed frequencies for all fields in the original data file. These tabulations served as a reference for the file in its original form and allowed comparison to final frequencies from previous years, helping to pinpoint problem areas that needed cleaning and editing. MPR examined these frequencies and cross-tabulations, using the results to adapt and modify the cleaning and editing specifications as necessary.

6. Data Cleaning and Recoding of Variables

MPR's plan for data quality for both versions of the child questionnaire is found in the 2003 Child Coding Scheme. It contains detailed instructions for all editing procedures used to correct data inconsistencies and errors. The Coding Scheme tables are found in Appendix D. These tables outline in detail the approach for recoding self-reported fields, doing range checks, logic checks, and skip pattern checks to insure that responses are consistent throughout the questionnaire. The Coding Scheme tables specify all possible original responses and any recoding, also indicating if backward coding or forward coding was used. Every skip pattern is assigned a note number shown in the annotated questionnaire (Appendix A). This note number defines the flag (for example, the Note 5 flag is N5) that is set to indicate the pattern of the original responses and any recoding. Thus, if the value of N5 is 2, the reader can look at line 2 in the Note 5 table for the original and recoded response values.

The SAS program implementing the Coding Scheme is found in Appendix G-2.

a. Skip Pattern Checks

At several points in the survey, the respondent should skip certain questions. If the response pattern is inconsistent with the skip pattern, each response in the series will be checked to determine which are most accurate, given the answers to other questions. Questions that are appropriately skipped were set to the SAS missing value of '.N'. Inconsistent responses, such as

answering questions that should be skipped or not answering questions that should be answered, were examined for patterns that could be resolved. Frequently, responses to subsequent questions provide the information needed to infer the response to a question that was left blank. 2003 Child Coding Scheme (see Appendix D) specifically addresses every skip pattern and shows the recoded values for variables within each pattern; we back coded and/or forward coded to ensure that all responses are consistent within a sequence.

b. Missing Values

NRC initially encoded any question with missing responses to a SAS missing value code of ‘.’. After verifying skip patterns, MPR recoded some of these responses to reflect valid skips (SAS missing value code of ‘.N’). The complete list of codes for types of missing values such as multiple responses, incomplete grids, and questions that should not have been answered is shown in Table 3.3.

Occasionally, missing questionnaire responses can be inferred by examining other responses. For example, if a respondent fails to answer Question 25 regarding appointments made by sponsors for their child for regular or routine care, but answers Questions 26 about how often their child got an appointment for regular or routine care as soon as they wanted, we can reason that they did make an appointment in the past 12 months. Using this technique, we successfully recoded some missing questionnaire responses to legitimate responses.

c. Multiple Response Errors

If a respondent gives more than one answer to a question that should have only one answer, the response to that question was coded with a SAS missing value of ‘.A’.

Using an approach similar to that used for missing values, we examined other questionnaire responses in an attempt to infer what the respondent intended for those questions with multiple marks. For example, if there are multiple responses to Question 23 “In the last 12 months, did you call a doctor’s office or clinic during regular office hours to get help or advice for your child?” and the response to Question 24 indicates that the respondent usually got help or advice they needed for their child, we assume that the response to Question 23 should have been yes.

7. Quality Assurance

MPR created an edit flag for each Coding Scheme table that indicates what, if any, edits were made in the cleaning and editing process. This logic was also used in previous years; variables such as N5 (see Appendix D) indicate exactly what pattern of the Coding Scheme was followed for a particular set of responses. These edit flags have a unique value for each set of original and recoded values, allowing us to match original values and recoded values for any particular sequence.

In order to validate the editing and cleaning process, MPR prepared cross-tabulations between the original variables and the recoded variables with the corresponding edit flag. This revealed any discrepancies that needed to be addressed. In addition, we compared unweighted frequencies of each variable with the frequencies from the original file to verify that each variable was accurately recoded. MPR reviewed these tabulations for each variable in the survey. If necessary, the earlier edit procedures were modified and the Coding Scheme program rerun. The resulting file was clean and ready for weighting adjustments and constructed variables.

C. RECORD SELECTION

To select final records, we first defined a code that classifies each sampled beneficiary as to his/her final response status. To determine this response status, we used postal delivery information

provided by NRC for each sampled beneficiary. This information is contained in the FLAG_FIN variable and is described in Table 3.4.

TABLE 3.4
FLAG_FIN VARIABLE

Value	Questionnaire Return Disposition	Reason/Explanation Given	Eligibility
1	Returned survey	Completed and returned	Eligible
2	Returned ineligible	Returned with at least one question marked and information that the beneficiary was ineligible	Ineligible
3	Returned blank	Information sent that beneficiary is temporarily ill or incapacitated	Eligible
4	Returned blank	Information sent that beneficiary is deceased	Ineligible
5	Returned blank	Information sent that beneficiary is incarcerated or permanently incapacitated	Ineligible
6	Returned blank	Information sent that beneficiary left military, or divorced after 1/31/03, or retired	Eligible
7	Returned blank	Information sent that beneficiary was not eligible on 1/31/03	Ineligible
8	Returned blank	Blank form accompanied by reason for not participating	Eligible
9	Returned blank	No reason given	---
10	No return	Temporarily ill or incapacitated. Information came in by phone	Eligible
11	No return	Active refuser. Information came in by phone	Eligible
12	No return	Deceased. Information came in by phone	Ineligible
13	No return	Incarcerated or permanently incapacitated. Information came in by phone	Ineligible
14	No return	Left military or divorced after 1/31/03, or retired. Information came in by phone	Eligible
15	No return	Not eligible on 1/31/03. Information came in by phone	Ineligible
16	No return	Other eligible. Information came in by phone	Eligible
17	No return	No reason	---
18	PND	No address remaining	---
19	PND	Address remaining at the close of field	---
20	Original Non-Locatable	No address at start of mailing	---
21	No return or returned blank	Written documentation declining participation, no reason given	Eligible
22	No return or returned blank	Hospitalized but no indication if temporary or permanent	---
23	Returned blank - deployed	Survey was returned blank along with information that the beneficiary was deployed.	Eligible
24	No return- deployed	Survey was not returned, beneficiary was deployed	Eligible

Using the above variables in Table 3.4, we classified all sampled beneficiaries into four groups:

- **Group 1:** Eligible, Questionnaire Returned. Beneficiaries who were eligible for the survey and returned a questionnaire with at least one question answered (FLAG_FIN = 1)
- **Group 2:** Eligible, Questionnaire Not Returned (or returned blank). Beneficiaries who did not complete a questionnaire but who were determined to be eligible for military health care on June 1, 2003, that is, not deceased, not incarcerated, and not permanently hospitalized (FLAG_FIN = 3, 6, 8, 10, 11, 14, 16, 21)
- **Group 3:** Ineligible Beneficiaries who were ineligible because of death, institutionalization, divorce, or no longer being in the MHS as of June 1, 2003 (FLAG_FIN = 2, 4, 5, 7, 12, 13, 15)
- **Group 4:** Eligibility Unknown. Beneficiaries who did not complete a questionnaire and for whom survey eligibility could not be determined (FLAG_FIN = 9, 17, 18, 19, 20, 22)

Group 1 was then divided into two subgroups according to the number of survey items completed (including legitimate skip responses):

- G1-1. Complete Questionnaire Returned
- G1-2. Incomplete Questionnaire Returned

G1-1 consists of eligible respondents who answered “enough” questions to be classified as having completed the questionnaire. G1-2 consists of eligible respondents who answered only a few questions. To determine if a questionnaire is complete, 26 key questions were adapted from the complete questionnaire rule for the CAHPS 2.0. The key questions are: 2, 3, 7, 14, 18, 23, 25, 28, 31, 34, 35, 57, 72, 76, 78, 80, 83, 85, 89, 104, 105, 107, 108, 109, 111. If fourteen or more of these key items are completed, then the questionnaire can be counted as complete.

Furthermore, we also subdivided Group 4 into the following:

- G4-1 for Locatable-blank return/no reason or no return/no reason (FLAG_FIN = 9, 17, 22)
- G4-2 for Nonlocatable-postal nondeliverable/no address, postal nondeliverable/had address, or original nonlocatable (FLAG_FIN = 18, 19, 20).

With this information, we can calculate the location rate (see Section 4.A).

With a code (FNSTATUS) for the final response/eligible status, we classified all sampled beneficiaries using the following values of FNSTATUS:

- 11 for G1-1
- 12 for G1-2
- 20 for Group 2
- 30 for Group 3
- 41 for G4-1
- 42 for G4-2

There were 226 duplicate questionnaires in the data set NRC delivered. All duplicates were classified into one of the above six groups. We then retained the one questionnaire for each beneficiary that had the most “valid” information for the usual record selection process. For example, if two returned questionnaires from the same beneficiary have FNSTATUS code values of 11, 12, 20, 41, or 42, we retained the questionnaire with the smaller value.

However, if one of a pair of questionnaires belongs to Group 3 (FNSTATUS = 3, i.e., ineligible), then we regarded the questionnaire as being ineligible.

Only beneficiaries with FNSTATUS = 11 were retained. All other records were dropped.

D. CONSTRUCTED VARIABLES

One of the most important aspects of database development is the formation of constructed variables and scale variables to support analysis. Constructed variables are formed when no single question in the survey defines the construct of interest. In Table 3.1 there is a list of all constructed variables for 2003. Each constructed variable is discussed in this section and the relevant piece of SAS code is shown. All SAS programs can be found in Appendix G.

1. Demographic Variables

a. Super region (SUPREG)

This variable groups the CONUS regions into 3 super regions: new, mature and other regions. Regions are grouped to reflect relative maturity of TRICARE Prime in each region.

New region contains regions 1, 2, and 5. Mature region consists of regions 6, 9, 10, 11, 12, and 16. Other region is comprised of the remainder of the CONUS regions.

```
*****
* Assign SUPREG
*****
IF REGSMPL IN (1,2,5) THEN SUPREG = 1;
ELSE IF REGSMPL IN (6,9,10,11,12,16) THEN SUPREG = 2;
ELSE IF REGSMPL IN (3,4,7,8) THEN SUPREG=3;
```

2. TRICARE Prime Enrollment and Insurance Coverage

a. TRICARE Prime Enrollment Status (XENRLLMT)

For reporting purposes, a person is considered enrolled in TRICARE Prime if the enrollment type (ENBGSMPL), based on DEERS data, indicates that they were enrolled at the time of data collection. The two categories for TRICARE Prime enrollment are as follows:

1 = Enrollees
 2 = Not enrolled in TRICARE Prime

 . = Unknown

```
/* XENRLLMT--ENROLLMENT STATUS */
IF ENBGSMPL IN (1,2,3,5,6) THEN XENRLLMT = 1; /* Enrolled */
ELSE IF ENBGSMPL IN (4,7) THEN XENRLLMT = 2; /* Not Enrolled */
```

b. TRICARE Prime Enrollment Status by Primary Care Manager (XENR_PCM)

This variable determines if a child has a civilian or a military primary care manager (PCM).

1 = Enrolled with a military PCM

2 = Enrolled with a civilian PCM
3 = Not enrolled

```
/* XENR_PCM--ENROLLMENT BY PCM TYPE */  
IF ENBGSMPL IN (1,3,6) THEN XENR_PCM=1; /* 1=Enrolled - mil PCM */  
ELSE IF ENBGSMPL IN (2,5) THEN XENR_PCM=2; /* 2=Enrolled - civ PCM */  
ELSE IF ENBGSMPL IN (4,7) THEN XENR_PCM=3; /* 3=Not Enrolled */
```

c. Most-Used Health Plan (XINS_COV)

The respondent's most-used health plan comes directly from Question 2. The three categories for this variable are as follows:

1 = TRICARE Prime
2 = TRICARE Standard/Extra (CHAMPUS)
3 = Other civilian health insurance or civilian HMO
. = Unknown

```
/* XINS_COV--INSURANCE COVERAGE */  
IF C03002 = 1 THEN XINS_COV = 1; /* Prime */  
ELSE IF C03002 = 3 THEN XINS_COV = 2; /* Standard/Extra */  
ELSE IF C03002 IN (5,6,7,8,9) THEN XINS_COV = 3; /* Other Insurance */
```

d. Types of Coverage (KCVINS)

A binary variable was created to indicate the types of insurance that respondents use:

- Is the respondent covered by Civilian insurance (KCVINS)

This variable has the following values:

1 = Yes
2 = No
.= Unknown

```
/* KCVINS--IS BENEFICIARY COVERED BY CIVILIAN INSURANCE */  
IF (C03004C=1 OR C03004D=1 OR C03004G=1) THEN KCVINS=1; /* YES */  
ELSE KCVINS=2;
```

e. Beneficiary group (XBNFGRP)

This variable is equal to the sampling variable BGCSMPL and has the following values:

1 = Active duty
2 = Family of active duty
3 = Family of retirees or survivors
.= Unknown

```
/* XBNFGRP-Beneficiary Group that excludes those 65 and over-  
Active Duty and Family Members of Active Duty */  
XBNFGRP=BGCSMPL;
```

3. Access to Care (KMILWAT1, KCIVWAT1, KMILOFFC, KCIVOFFC, KBGPRB1, KBGPRB2)

Many of the survey questions on access relate directly to a TRICARE performance standard. The questions in the Section “Your Child’s Healthcare in the Last 12 Months” of the questionnaire refer to all healthcare received in the last 12 months. For these questions, we constructed binary variables, separately for respondents who used military and civilian facilities the most, indicating whether the TRICARE standard was met. Table 3.5 presents those standards that were analyzed in the reports. The new variables have the following values:

- 1 = Standard was met
- 2 = Standard was not met
- . = Missing information

TABLE 3.5
TRICARE STANDARDS FOR ACCESS

Access Measure	TRICARE Standard	Variable Name	Relevant Question
Wait for a Well Visit	Less than 4 weeks	KMILWATI, KCIVWATI	30
Waiting Room Wait	Within 15 minutes	KMILOFFC, KCIVOFFC	38

```

/* KMILWAT1--WAIT LESS THAN 4 WEEKS FOR WELL PATIENT VISIT AT MILFACILITIES
   KCIVWAT1--WAIT LESS THAN 4 WEEKS FOR WELL PATIENT VISIT AT CIV FACILITIES*/
IF C03057 = 1 THEN DO;
    /* Military */
    IF C03030 IN (1, 2, 3) THEN KMILWAT1 = 1; /* Yes */
    ELSE IF C03030 = 4 THEN KMILWAT1 = 2; /* No */
END;
ELSE IF C03057 = 2 THEN DO;
    /* Civilian */
    IF C03030 IN (1, 2, 3) THEN KCIVWAT1 = 1; /* Yes */
    ELSE IF C03030 = 4 THEN KCIVWAT1 = 2; /* No */
END;

/* KMILOFFC--OFFICE WAIT OF 15 MINUTES OR MORE AT MILITARY FACILITES
   KCIVOFFC--OFFICE WAIT OF 15 MINUTES OR MORE AT CIVILIAN FACILITES */
IF C03057 = 1 THEN DO;
    /* Military */
    IF C03038 IN (3,4) THEN KMILOFFC = 1; /* Yes */
    ELSE IF C03038 IN (1,2) THEN KMILOFFC = 2; /* No */
END;
ELSE IF C03057 = 2 THEN DO;
    /* Civilian */
    IF C03038 IN (3,4) THEN KCIVOFFC = 1; /* Yes */
    ELSE IF C03038 IN (1,2) THEN KCIVOFFC = 2; /* No */
END;
    
```

Question 19 asks how much of a problem, if any, it was to get a referral to a specialist. The responses to this question are regrouped by a binary variable KBGPRB1. KBGPRB1 looks at these two categories:

- 1 = Those who reported a “big problem”

2 = Those who reported not a "big problem"

. = Missing response

```
/* KBGPRB1--BIG PROBLEM GETTING REFERRALS TO SPECIALISTS */
IF C03019 =1 THEN KBGPRB1 =1; /* YES */
ELSE IF C03019 IN (2,3) THEN KBGPRB1 =2; /* NO */
```

Similarly, variable KBGPRB2 was constructed. Question 36 asks about how much of a problem, if any, it was to get the care you or a doctor believed necessary. The responses to this question are regrouped by a binary variable KBGPRB2. KBGPRB2 looks at these two categories:

1 = Those who reported a "big problem"

2 = Those who reported not a "big problem"

. = Missing response

```
/* KBGPRB2--BIG PROBLEM GETTING NECESSARY CARE */
IF C03036 =1 THEN KBGPRB2 =1; /* YES */
ELSE IF C03036 IN (2,3) THEN KBGPRB2 =2; /* NO */
```

4. Utilization

a. Outpatient Utilization (KMILOP, KCIVOP)

Question 35 contains the total number of outpatient visits. This is renamed to KMILOP or KCIVOP depending on the answer to Question 57. The new variables have the following values:

1 = no visits
 2 = 1 visit
 3 = 2 visits
 4 = 3 visits
 5 = 4 visits
 6 = 5 to 9 visits
 7 = 10 or more visits

```
/* KMILOP--OUTPATIENT VISITS TO MILITARY FACILITY
KCIVOP--OUTPATIENT VISITS TO CIVILIAN FACILITY */
IF C03057 = 1 THEN KMILOP=C03035;
ELSE IF (C03057=. AND C03035=.) THEN KMILOP=.;
ELSE KMILOP = 1 ;
IF C03057 = 2 THEN KCIVOP=C03035;
ELSE IF (C03057=. AND C03035=.) THEN KCIVOP=.;
ELSE KCIVOP = 1 ;
```

E. WEIGHTING PROCEDURES

Estimates based on the 2003 HCSDB must account for the survey's complex sample design and for the potential biasing effects due to nonresponse. As a part of sample selection, MPR constructed sampling weights (BWT) that reflect the differential selection probabilities used to sample beneficiaries across strata. Nonresponse can also lead to distortions of the respondent sample with respect to the total population of DoD health care beneficiaries. Adjustments were made to these sampling weights, BWT, to compensate for such distortions, using a weighting class method. These adjusted weights were also adjusted through the poststratification procedure to form the analysis weights, which we included in the final deliverable database. We also generated replicate weights for the final database so that users have the option of obtaining variance

estimates with a replication method as well as the Taylor series method. This section presents these weighting procedures for the 2003 Child HCSDB.

1. Constructing the Sampling Weight

The sampling weight was constructed on the basis of the sample design. In the 2003 Child HCSDB, stratified sampling was used to select the samples that would receive the questionnaire. Sampling for the Child survey was independently executed within strata defined by combinations of the three domains: enrollment status groups; age groups; and geographic areas.

The sample was selected with differential probabilities of selection across strata. Sample sizes were driven by predetermined precision requirements. For further details of the 2003 child sample design, see the *2003 Health Care Survey of DoD Beneficiaries: HCSDB Child Sample Report*. Our first step in weighting was to construct sampling weights that reflect these unequal sampling rates. These sampling weights can be viewed as the number of population elements that each sampled beneficiary represents. The sampling weight was defined as the inverse of the beneficiary's selection probability or:

$$(1) \quad W_s(h, i) = \frac{N(h)}{n(h)}$$

where:

$W_s(h, i)$ is the sampling weight for the i -th sampled beneficiary within the h -th stratum, $N(h)$ is the total number of beneficiaries in the h -th stratum, and $n(h)$ is the number of sampled beneficiaries from stratum h .

The sum of the sampling weights over selections from the h -th stratum equals the total population size of the h -th stratum or $N(h)$.

2. Adjustment for Total Nonresponse

Survey estimates obtained from respondent data only can be biased with respect to describing characteristics of the total population (Lessler and Kalsbeek 1992). To reduce this bias, we developed procedures to deal with the problems caused by nonresponse. Two types of nonresponse were associated with the 2003 Child HCSDB:

- Unit or total nonresponse occurs when a sampled beneficiary did not respond to the survey questionnaire (e.g., refusals, no questionnaire returned, blank questionnaire returned, bad address).
- Item nonresponse occurs when a question that should have been answered is not answered (e.g., refusal to answer, no response).

With high item response rates observed in previous Adult HCSDB surveys, statistical imputation was not used to compensate for item nonresponse in the 2003 Child HCSDB. To account for total nonresponse, we implemented a weighting class adjustment followed by a poststratification adjustment.

Weighting class adjustments were made by partitioning the sample into groups, called *weighting classes*, and then adjusting the weights of respondents within each class so that they sum to the weight total for nonrespondents and respondents from that class. Implicit in the weighting class adjustment is the assumption that — had the nonrespondents responded — their responses would have been distributed in the same way as the responses of the other respondents in their class.

The 2003 Child HCSDDB weighting classes were defined on the basis of the stratification variables: TRICARE Prime enrollment status, age group, and geographic area. To avoid excessive variance inflation, we required that each weighting class have at least 20 eligible respondents and that the adjustment factor not exceed 4.

Nonresponse adjustment factors for the 2003 Child HCSDDB were calculated in two steps. First, we adjusted the sampling weights to account for sampled beneficiaries for whom eligibility status could not be determined. Sampled beneficiaries were then grouped as follows according to their response status d :

- $d=1$ Eligible — completed questionnaire returned (FNSTATUS = 11)
- $d=2$ Eligible — incomplete or no questionnaire returned (FNSTATUS = 12 or 20)
- $d=3$ Ineligible — deceased incarcerated or permanently incapacitated beneficiary (FNSTATUS = 30)
- $d=4$ Eligibility unknown — no questionnaire or eligibility data (FNSTATUS = 41 or 42)

Within weighting class c , the weights of the $d=4$ nonrespondents with unknown eligibility were redistributed to the cases for which eligibility was known ($d=1,2,3$), using an adjustment factor $A_{wc1}(c,d)$ that was defined to be zero for $d=4$ and defined as:

$$(2) \quad A_{wc1}(c,d) = \frac{\sum_{i \in S(c)} W_s(c,i)}{\sum_{i \in S(c)} I_1(i)W_s(c,i) + \sum_{i \in S(c)} I_2(i)W_s(c,i) + \sum_{i \in S(c)} I_3W_s(c,i)} \quad \text{for } d = 1, 2, 3$$

where:

- $A_{wc1}(c,d)$ is the eligibility-status adjustment factor for weighting class c and response status code d ,
- $I_d(i)$ is the indicator function that has a value of 1 if sampled unit i has a response status code of d and 0 otherwise,
- $S(c)$ is the set of sample members belonging to weighting class c , and
- $W_s(c,i)$ is the sampling weight (BWT) for the i -th sample beneficiary from weighting class c before adjustment.

The adjustment $A_{wc1}(c,d)$ was then applied to the sampling weights to obtain the eligibility-status adjusted weight. Beneficiaries in weighting class c with response status code of d were assigned the eligibility-status adjusted weight:

$$(3) \quad W_{wc1}(c,d,i) = A_{wc1}(c,d) W_s(c,i)$$

Note that since $d=4$ cases have adjustment factors of zero, they also have adjusted weights of zero.

The next step in weighting was to adjust for the loss of completed questionnaires from beneficiaries known to be eligible. For this adjustment, the weighting class c from the previous step was again partitioned into groups according to the beneficiary's response status code d . Within weighting class c , the weights of the $d=2$ nonresponding eligibles were redistributed to the responding eligibles $d=1$, using an adjustment factor $A_{wc2}(c,d)$ that was defined to be zero for $d=2,4$. For Group 1 ($d=1$), the questionnaire-completion adjustment or $A_{wc2}(c,1)$ factor for class c was computed as:

$$(4) \quad A_{wc2}(c,1) = \frac{\sum_{i \in S(c)} I_1(i)W_{wc1}(c,i) + \sum_{i \in S(c)} I_2(i)W_{wc1}(c,i)}{\sum_{i \in S(c)} I_1(i)W_{wc1}(c,i)}$$

By definition, all $d=3$ ineligible beneficiaries “respond,” so the $d=3$ adjustment factor is 1, or $A_{wc2}(c,3)=1$. The questionnaire-completion adjusted weight was calculated as the product of the questionnaire-completion adjustment $A_{wc2}(c,d)$ and the previous eligibility-status adjusted weight $W_{wc1}(c,d,i)$, or:

$$(5) \quad W_{wc2}(c,d,i) = A_{wc2}(c,d) W_{wc1}(c,d,i)$$

As a result of this step, all nonrespondents ($d=2,4$) had questionnaire-completion adjusted weights of zero, while the weight for ineligible cases ($d=3$) remained unchanged, or $W_{wc2}(c,3,i)=W_{wc1}(c,3,i)$.

3. Poststratification

To minimize selecting more than one child per household, we assigned all children from a household to the same sampling stratum. Therefore, we needed to compensate for the resulting discrepancy in population totals by using poststratification for the 2003 HCSDDB. Poststratification adjustments forced the adjusted weight totals to the DEERS population totals for the specified population groups that formed the *poststrata*. We used DEERS data as of February 28th, 2003 as poststratification values for certain variables. Like stratum variables, poststratum variables are also a combination of three key domain variables: enrollment group, age group, and geographic area (super regions). Construction of age and super region groups is the same as in sampling strata variables except for the reference date.

After creating the cross-classification of the three poststrata variables, enrollment group, age group, and super regions, an additional usual poststratification adjustment was implemented. To illustrate the use of poststratification, let g index poststrata, where $g = 1, 2, \dots, G$. The poststratification adjustment factor for the g -th poststrata was defined as:

$$(6) \quad A_{ps}(g) = \frac{N(g)}{\sum_{h,i \in S(g)} W_{wc2}(h,i)}$$

where:

$N(g)$ is the total number of beneficiaries in the DEERS frame associated with the g -th poststratum, and

$S(g)$ is the set of sample records that are found in the g -th poststratum.

The poststratified adjusted weight for the i -th sample record from the h -th design stratum and the g -th poststratum was then calculated as:

$$(7) \quad W_{ps}(g,h,i) = A_{ps}(g) W_{wc2}(h,i)$$

When summed over members of poststratum g , the poststratified weights now total $N(g)$. This poststratified weight is the final analysis weight used for all reporting and analysis.

4. Calculation of Jackknife Replicates

We constructed the 60 jackknife replicates as follows. First, the entire file of sampled beneficiaries was sorted according to stratification variables. Next, 60 mutually exclusive and exhaustive systematic sub-samples of the full sample was identified in the sorted file.⁵ A jackknife replicate was then obtained by dropping one subsample from the full sample. By dropping each subsample in turn, the same number of different jackknife replicates as subsamples was defined. The entire weighting process as applied to the full sample was then applied separately to each of the jackknife replicates to produce a set of replicate weights for each record. A series of jackknife replicate weights (WRWT01-WRWT60) was then attached to each beneficiary record in the final database. Given jackknife replicate weights, WesVarPC[®] (Brick et al. 1996) can be used to construct jackknife replication variance estimates.

⁵With 60 replicates, further statistical analyses such as confidence intervals and hypothesis tests can be based on approximate normal distribution. Inferences with finite replicate number k are based on the student t distribution with $k-1$ degrees of freedom. Thus, with 60 replicates, normal approximation can be used in constructing confidence intervals or hypothesis testing.

Analysis

This chapter explains how the Child HCSDb variables were processed during the analysis phase of the project. It covers the procedure for calculating response rates, the method for estimating the variance of the statistics, significance tests, demographic adjustment, development of the dependent and independent variables for the analysis, and report production.

This year's results are being presented in an electronic format.

A. RESPONSE RATES

In this section, we present the procedures for response rate calculation along with a brief analysis of response rates for domains of interest. Response rates for the 2003 Child HCSDb were calculated in the same way as they were calculated for the 2003 Adult HCSDb. The procedure is based on the guidelines established by the Council of American Survey Research Organizations (CASRO 1982) in defining a response rate.

1. Definition of Response Rates

In calculating response rates and related measures, we considered two different rates: *unweighted* and *weighted*. The unweighted version of the response rate represents the counted proportion of respondents among all sampled units, and the weighted version indicates the estimated proportion of respondents among all population units. When sampling rates across all strata are equal, these two approaches give the same result. However, the 2003 HCSDb used different sampling rates across strata. So, it is useful to show both "unweighted" and "weighted" response rates. We calculated these two response rates in the same way. As presented in Chapter 3.C, all sampled beneficiaries were completely classified into these four main (six detailed) groups: Group 1 (G1-1 and G1-2), Group 2, Group 3, and Group 4 (G4-1 and G4-2):

- Group 1 (G1-1): eligible and complete questionnaire returned;
- Group 1 (G1-2): eligible and incomplete questionnaire returned;
- Group 2: eligible and questionnaire not returned;
- Group 3: ineligible
- Group 4 (G4-1): eligibility unknown and locatable; and
- Group 4 (G4-2): eligibility unknown and unlocatable.

The unweighted counts reflect the number of sampled cases (n_i for Group i , where $i=1,2,3,4$), and the weighted counts reflect the estimated population size¹ (\hat{N}_i for Group i , where $i=1,2,3,4$) for the four main response categories.

¹The weighted sum of sampled units can be regarded as an estimated population size. The base weight (BWT) was used in calculating weighted counts, where BWT is the inverse of selection probability.

These weighted and unweighted counts were also calculated for the subgroups G1-1, G1-2, G4-1, and G4-2, where we denote the unweighted counts by $n_{1,1}$, $n_{1,2}$, $n_{4,1}$, and $n_{4,2}$, and the weighted counts by $\hat{N}_{1,1}$, $\hat{N}_{1,2}$, $\hat{N}_{4,1}$, and $\hat{N}_{4,2}$. With these values, we calculated response rates as follows. Response rates can be partitioned into two measures: the location rate and the completion rate. To calculate the location rate, we first estimated the number of Group 4 “located” beneficiaries who were expected to be eligible for the survey:

(1)

$$l = \left(\frac{n_1 + n_2}{n_1 + n_2 + n_3} \right) n_{4,1} \quad \text{and} \quad l_w = \left(\frac{\hat{N}_1 + \hat{N}_2}{\hat{N}_1 + \hat{N}_2 + \hat{N}_3} \right) \hat{N}_{4,1}$$

where l and l_w are unweighted and weighted estimates of the number of “located” beneficiaries among Group 4. Then, the unweighted and weighted “location rates” are defined by:

(2)

$$LR = \frac{n_1 + n_2 + l}{n_1 + n_2 + n_4 \left(\frac{n_1 + n_2}{n_1 + n_2 + n_3} \right)} \quad \text{and} \quad LR_w = \frac{\hat{N}_1 + \hat{N}_2 + l}{\hat{N}_1 + \hat{N}_2 + \hat{N}_4 \left(\frac{\hat{N}_1 + \hat{N}_2}{\hat{N}_1 + \hat{N}_2 + \hat{N}_3} \right)}$$

And the corresponding unweighted and weighted “completion rates” are defined by:

(3)

$$CR = \frac{n_{1,1}}{n_1 + n_2 + l} \quad \text{and} \quad CR_w = \frac{\hat{N}_{1,1}}{\hat{N}_1 + \hat{N}_2 + l_w}$$

The final response rates can be obtained by multiplying the location rate in Equation (2) by the completion rate in Equation (3).

(4)

$$FRR = LR \times CR \quad \text{and} \quad FRR_w = LR_w \times CR_w$$

In the definitions in Equations (1) through (4), the subscript “w” indicates that all calculations involve weighted counts. The method that we used to calculate response rates is consistent with the CASRO guidelines.

2. Reporting

We examined response rates to identify patterns across different domains or characteristics. While analysts prefer weighted rates that reflect the estimated proportion of respondents among all population beneficiaries, operational staff are often interested in getting unweighted measures. All tables include unweighted and weighted values under columns headed “Unweighted” and “Weighted”, respectively. In the following, we focus on discussing unweighted response rates for

domains of interest. Table 4.1 includes response rates for the 2003 Child HCSDB as a whole, by enrollment status by age groups, and by super regions.

- Overall: The overall unweighted response rate for the 2003 Child HCSDB was about 31 percent (which is found in Table 4.1 in the row of “Overall” under the column of “RR” in “Unweighted”).
- Enrollment status: Sponsors of nonenrollees had an unweighted response rate of 28 percent, which is less than the rate for children enrolled in Prime (33 percent).
- Age group: Unweighted response rates according to age groups are: Sponsors of children younger than 6 years old - 29 percent; between 6 and 12 years old - 30 percent; between 13 and 17 years old - 33 percent
- Geographic area: Unweighted response rates according to region are: New regions – 33 percent; mature regions – 29 percent; and other regions – 31 percent.

TABLE 4.1

UNWEIGHTED AND WEIGHTED RESPONSE RATES OVERALL, BY ENROLLMENT GROUP, BY AGE GROUP, AND SUPER REGION

		RR (unweighted) (%)	RR _w (weighted) (%)
Overall		30.8	31.6
Enrollment Group	Enrolled	33.4	33.2
	Not enrolled	27.9	28.2
Age Group	Younger than 6 years old	29.3	30.1
	Between 6 and 12 years old	30.4	31.3
	Between 13 and 17 years old	32.8	33.4
Super Region	New Regions (regions 1, 2, 5)	32.7	33.0
	Mature regions (regions 6, 9-12 and 16)	29.2	30.4
	Other regions (regions 3, 4, 7, 8)	30.5	31.0

B. VARIANCE ESTIMATION

To calculate the standard errors (the squared roots of variances) of estimates for the 2003 HCSDb analyses, we used SUDAAN™ (Shah et al. 1996) and the Taylor series linearization method. For analysts who prefer a replication method, 60 replicate weights for jackknife replication are provided in the public use file. Here we describe variance estimation methods for the Taylor series linearization method and the jackknife replication method.

1. Taylor Series Linearization

MPR uses Taylor series linearization to produce standard errors for the estimates from the 2003 HCSDb for adults and children. For most sample designs, including the 2003 HCSDb, design-based variance estimates for linear estimators of totals and means can be obtained with explicit formulas. Estimators for nonlinear parameters such as ratios do not have exact expressions for the variance. The Taylor series linearization method approximates the variance of a nonlinear estimator with the variances of the linear terms from the Taylor series expansion for the estimator (Woodruff 1971). To calculate variance estimates based on the Taylor series linearization method, given HCSDb's stratified sampling design, we need to identify the stratum as well as the final analysis weight for each data record. We included these variables on the final database. For variance estimation, we use the general purpose statistical software package SUDAAN to produce Taylor series variance estimates. SUDAAN is the most widely used of the publicly available software packages based on the Taylor series linearization method. In SUDAAN, the user specifies the sampling design and includes variables recording stratum and the analysis weight for each record. MPR uses SAS to make camera-ready tables for numerical results from SUDAAN. There is no restriction to the number of strata in SUDAAN, so stratification effects can be incorporated in calculating standard errors.

Some of the reported estimates are composite scale scores that are linear functions of individual estimates. The sampling variance for these scale estimates can be directly obtained from the usual design-based variance estimation formula by incorporating the covariance terms among individual items within the scale.

(5)

$$\text{Let } \bar{y} = \frac{\sum_{h=1}^L \sum_{i=1}^{n_h} W_{hi} Y_{hi}}{\sum_h \sum_i W_{hi}}$$

denote an estimator of a composite scale where individual composite measure for beneficiary (h, i) consists of r items is thus denoted as:

(6)

$$Y_{hi} = \sum_{j=1}^r X_{hi,j} / r .$$

Then, a customary variance estimator of \bar{y} is the sum of the item variances and covariances among item estimates:

(7)

$$v(\bar{y}) = \frac{1}{r^2} \left\{ \sum_{j=1}^r v_j + \sum_{j \neq j'} \text{cov}(\bar{x}_j, \bar{x}_{j'}) \right\} ,$$

where v_j is a variance estimator of \bar{x}_j .

All of the variance components can be obtained from the usual survey specific software such as SUDAAN and WesVarPC, which are described above.

2. Jackknife Replication

Jackknife replicate weights can be used to calculate the standard errors of estimates. An estimate of a characteristic of interest is calculated (with the same formula as the full sample estimate) using each set of replicate weights; these replicate estimates are used to derive the variance of the full sample statistic.

a. Calculation of Jackknife Replicates

A series of jackknife replicate weights are calculated and attached to each beneficiary record in the database. In jackknife replication, a prescribed number of replicates are generated by deleting selected cases from the full sample. Given jackknife replicate weights, WesVarPC[®] (Brick et al. 1996) can be used to produce variance estimates. WesVarPC allows jackknife variance estimation for two primary sampling units per stratum up to 100 strata, or up to 256 replicates without stratification. The 2003 HCSDDB for children involves 27 strata. To use WesVarPC, we must modify the actual design to create appropriate replicates. The two options for doing this are to (1) form fewer than 256 replicates by ignoring stratification or (2) form replicates by assigning each unit to one of two pseudo primary sampling units (PSUs) within each of the 27 strata. For either option, the entire weighting process as described in the previous sections must be applied for each jackknife replicate.

To be consistent with the adult survey, we use option 1 to construct the jackknife replicates as follows. First, the entire file of sampled beneficiaries is sorted in sample selection order in which stratification variables are only used in the sorting process. Next, 60 mutually exclusive and exhaustive systematic subsamples¹ of the full sample are identified in the sorted file. A jackknife replicate is then obtained by dropping one subsample from the full sample. As each subsample is dropped in turn, the same number of different jackknife replicates as subsamples is defined. The entire weighting process as applied to the full sample is then applied separately to each of the jackknife replicates to produce a set of replicate weights for each record. Then, the series of jackknife replicate weights (WRWT01 – WRWT60) is attached to the final data in order to construct jackknife replication variance estimates.

b. Software for Jackknife Replication

The jackknife variance of the full sample statistic of interest is estimated from the variability among the replicated estimates. When the replicate weights are produced according to the above procedure, jackknife replicate standard errors can be produced using custom written software or publicly available statistical software. For instance, WesVarPC is a popular software package that calculates standard errors based on replication methods. It produces standard errors for functions

¹With 60 replicates, further statistical analyses such as confidence intervals and hypothesis tests can be based on an approximate normal distribution. Inferences with finite replicate numbers k are based on the student t distribution with $k-1$ degrees of freedom. Thus, with 60 replicates, normal approximation can be used in constructing confidence intervals or hypothesis testing.

of survey estimates such as differences and ratios as well as simple estimates such as mean, proportion, and totals. Additional details about the jackknife replication approach are given in Wolter (1985). Like other replication methods, the jackknife variance estimation can be easily implemented for any form of estimate without further algebraic work.

C. SIGNIFICANCE TESTS

In the child TRICARE Consumer Report statistical testing is done to show whether values in the report cards are statistically different from external benchmarks.

The null hypothesis for this significance test is that a mean value is essentially equal to the benchmark, and the alternative is that a mean value is different from the benchmark. That is, we are testing:

$$H_0: \mu_1 = \mu_2 \quad \text{vs.} \quad H_a: \mu_1 \neq \mu_2$$

For instance, μ_1 might represent the characteristic of interest for mature regions while μ_2 might represent the benchmark.

With large sample sizes, the estimator $\overline{y_1 - y_2}$ is approximately distributed as a normal distribution with mean zero and variance $\sigma_{y_1 - y_2}^2$ under the null hypothesis. In testing the hypothesis, a test Statistic T is thus calculated as:

$$T = \frac{\overline{y_1 - y_2}}{\hat{\sigma}_{y_1 - y_2}}.$$

With $\alpha = 0.05$, the null hypothesis should be rejected if $|T| > 1.96$. The denominator of T, the standard error of $\overline{y_1 - y_2}$, can be calculated as the square root of the variance estimator $\sigma_{y_1 - y_2}^2$:

$$\hat{\sigma}_{y_1 - y_2}^2 = \text{var}(\overline{y_1}) + \text{var}(\overline{y_2}) - 2 \text{cov}(\overline{y_1}, \overline{y_2}).$$

If $\overline{y_1}$ and $\overline{y_2}$ are independent, then the covariance term equals zero and thus the variance estimator can be easily obtained as the sum of two individual variance estimators. With an external benchmark, the covariance can be assumed to be zero.

D. DEMOGRAPHIC ADJUSTMENTS

All scores in the report card are adjusted for children's and parent's characteristics affecting their scores.

The purpose of risk-adjustment is to make comparisons of outcomes, either internally or to external benchmarks, that control for characteristics of the respondent beyond the health care provider's

control. Based on previous work with CAHPS, it appears that ratings are affected by characteristics of children and their parents. Besides controlling for these factors, the methodology used:

- Permits risk-adjusted comparisons among regions within and across beneficiary and enrollment groups
- Permits testing the hypothesis that the difference in risk-adjusted scores between a region or the rest of the MHS and a benchmark is due to chance
- Is appropriate for CAHPS composites and global satisfaction ratings

A different model for each beneficiary group, l , is used for this adjustment:

$$Y_{jkl} = \beta_{1l}A_{1l} + \beta_{2l}A_{2l} + \dots + \beta_{7l}A_{7l} + \beta_{8l}P_l + \varepsilon_{jkl},$$

where Y is a dependent variable, $\beta_{q'l}$'s are parameters to be estimated, $A_{q'l}$'s are parents' age dummy variables ($A_{q'l} = 1$ if the parent is in age group q , and 0 otherwise; $A_1 =$ age 18-24, $A_2 =$ age 25-34, $A_3 =$ age 35-44, $A_4 =$ age 45-54, $A_5 =$ age 55-64, $A_6 =$ age 65-74, $A_7 =$ age 75 and over) and P_l is the child's health status. The subscripts j and k refer to the region and beneficiary, respectively.

Given 3 super regions, the specification we use is:

$$\varepsilon_{jkl} = \delta_{0l} + \delta_{1l}R_{1j} + \delta_{2l}R_{2j} + w_{jkl},$$

where R_j 's are regional dummy variables ($R_{jl} = 1$ if the beneficiary is in super region j and beneficiary group l , and 0 otherwise).

The adjusted mean of the dependent variable Y for region j can be obtained as:

$$\overline{y}_j = \hat{\delta}_0 + \hat{\delta}_j + \hat{\beta}_1\hat{A}_1 + \hat{\beta}_2\hat{A}_2 + \dots + \hat{\beta}_7\hat{A}_7 + \hat{\beta}_8\hat{P},$$

where $\hat{\beta}_q$'s are estimated model parameters, \hat{A}_q 's are weighted proportions of age group q among the MHS parent population, and \hat{P} is the weighted MHS mean health status. For beneficiary group l , the adjusted regional value is:

$$\overline{y}_{jl} = \hat{\delta}_{0l} + \hat{\delta}_{jl} + \hat{\beta}_{1l}\hat{A}_{1l} + \hat{\beta}_{2l}\hat{A}_{2l} + \dots + \hat{\beta}_{7l}\hat{A}_{7l} + \hat{\beta}_{8l}\hat{P}_l,$$

where \hat{A}_q 's are weighted proportions of age group q for parents of beneficiary group l in the MHS.

E. REPORTS

This section discusses the main purpose of the Child Consumer Reports. For further statistical and web specifications for the Child Consumer Reports, please refer to Appendices E and F.

1. 2003 Child TRICARE Consumer Report

a. Purpose

The purpose of the report is to provide Lead Agents and MTF commanders with a comprehensive description of TRICARE beneficiaries' satisfaction with their child's care relative to civilian benchmarks. The report provides an easy-to-understand snapshot of various aspects of the quality of care in the MHS. Users can easily "drill down" to follow the performance of providers among different enrollment and beneficiary groups.

b. Consumer Report Production

1) Programming Specifications

Data for the report are arranged in a SAS dataset and consist of summary records indexed by region, age group, and enrollment group. Benchmark records with no geographic reference are also included in the file. A summary record contains: mean composite scores, p-values for tests of difference from the relevant benchmark, a categorical variable describing the existence and direction of significant differences. Other records contain mean scores for individual elements of the composite. Benchmark records contain national mean values for a comparable population. Programs used to produce the report cards are in Appendix E.

2) Web Specifications

The SAS dataset serves as the basis for the electronic report. For the 2003 HCSDDB, a single file contains all super regions and CONUS values. Current values are compared with values from past years. Specifications for the web design of the child consumer reports are in Appendix F.

APPENDIX A

ANNOTATED QUESTIONNAIRE

Health Care Survey of DoD Beneficiaries Child Questionnaire

PAGE IS INTENTIONALLY LEFT BLANK TO ALLOW FOR DOUBLE-SIDED COPYING

SURVEY INSTRUCTIONS

Answer all the questions by checking the circle to the left of your answer. You are sometimes told to skip over some questions in this survey. When this happens you will see a note that tells you what question to answer next, like this:

- Yes **Go to Question 1**
 No

Please return the completed questionnaire in the enclosed postage-paid envelope within **seven days**. If you have misplaced the envelope, our address is:

Office of the Assistant Secretary of Defense (Health Affairs)
c/o Survey Processing Center
PO Box 82660
Lincoln, NE 68501-9462

According to the Privacy Act of 1974 (Public Law 93-579), the Department of Defense is required to inform you of the purposes and use of this survey. Please read it carefully.

Authority: 10 U.S.C., Chapter 55, Section 572, Public Law 102-484, E.O. 9397.

Purpose: This survey helps health policy makers gauge beneficiary satisfaction with the current military healthcare system and provides valuable input from beneficiaries that will be used to improve the Military Health System.

Routine Uses: None

Disclosure: Voluntary. Failure to respond will not result in any penalty to the respondent. However, maximum participation is encouraged so that data will be as complete and representative as possible.

-----SURVEY STARTS HERE-----

Please answer the questions for the child whose name appears on the envelope. Please do not answer for any other children.

1. **Are you an adult responsible for the child listed on the envelope?**

- Yes **Go to Question 2**
 No **Please give this questionnaire to a person responsible for that child.**

2. **Which health plan did you use for all or most of your child's health care in the last 12 months? MARK ONLY ONE.**

- TRICARE Prime
 TRICARE Extra/Standard (CHAMPUS)
 Federal Employees Health Benefit Program (FEHBP)
 Medicaid
 A civilian HMO (such as Kaiser)
 Other civilian health insurance (such as Blue Cross)
 Uniform Services Family Health Plan (USFHP)
 Not sure
 My child did not use any health plan in the last 12 months.

For the remainder of this questionnaire, the term health plan refers to the plan you marked in Question 2.

3. **In the last 12 months, how many months in a row was your child enrolled in this health plan?**

- Less than 2 months
 2-6 months
 7-12 months
 Not enrolled in a health plan in the last 12 months.

002MMD2I

0122629

4. By which of the following healthcare plans is your child currently covered? **MARK ALL THAT APPLY.**

- TRICARE Prime
- TRICARE Extra/Standard (CHAMPUS)
- A civilian HMO (such as Kaiser)
- Other civilian insurance (such as Blue Cross)
- Medicaid
- Uniform Services Family Health Plan (USFHP)
- Federal Employees Health Benefit Program (FEHBP)
- My child did not use any health plan in the last 12 months
- Not sure

-----YOUR CHILD'S PERSONAL DOCTOR OR NURSE-----

The next questions ask you about your child's health care. Do not include care your child got when he or she stayed overnight in a hospital. Do not include the times your child went for dental care visits.

5. A personal doctor or nurse is the health provider who knows your child best. This can be a general doctor, a specialist doctor, a nurse practitioner, or a physician assistant.

When your child joined this health plan or at any time since then, did he or she get a new personal doctor or nurse?

- Yes No **Go to Question 7**

6. With the choices your child's health plan gave you, how much of a problem, if any, was it to get a personal doctor or nurse for your child you are happy with?

- A big problem
- A small problem
- Not a problem

7. Do you have one person you think of as your child's personal doctor or nurse? If your child has more than one personal doctor or nurse, choose the person your child sees most often.

- Yes No **Go to Question 14**

8. In the last 12 months, not counting the times your child went to the emergency room, how many times did your child go to his or her personal doctor or nurse's office or clinic?

- None **Go to Question 10**
- 1
- 2
- 3
- 4
- 5 to 9
- 10 or more

9. In the last 12 months, did your child's personal doctor or nurse talk with you about how your child is feeling, growing, or behaving?

- Yes No

10. Does your child have any medical, behavioral or other health conditions that have lasted for more than 3 months?

- Yes No **Go to Question 13**

11. Does your child's personal doctor or nurse understand how these medical, behavioral or other health conditions affect your child's day-to-day life?

- Yes No

12. Does your child's personal doctor or nurse understand how your child's medical, behavioral or other health conditions affect your family's day-to-day life?

- Yes No

002MMD3J

0122629

13. We want to know your rating of your child's personal doctor or nurse. If your child has more than one personal doctor or nurse, choose the person your child sees most often.

Use any number from 0 to 10 where 0 is the worst personal doctor or nurse possible and 10 is the best personal doctor or nurse possible. How would you rate your child's personal doctor or nurse now?

- 0 Worst personal doctor or nurse possible
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 Best personal doctor or nurse possible
- My child doesn't have a personal doctor or nurse.

14. For members of TRICARE Prime, the primary point of contact regarding your child's health is called a primary care manager or PCM. This may be the same person as your child's personal doctor or nurse. Does your child have a TRICARE primary care manager?

- Yes **Go to Question 15**
- No **Go to Question 18**
- I don't know **Go to Question 18**
- My child is not enrolled in TRICARE Prime. **Go to Question 18**

15. Do you know the name of your child's TRICARE Prime primary care manager?

- Yes
- No
- My child doesn't have a TRICARE primary care manager. **Go to Question 18**

16. In the last 12 months, how much of a problem was it for your child to see his or her TRICARE primary care manager?

- A big problem
- A small problem
- Not a problem
- My child doesn't have a TRICARE primary care manager. **Go to Question 18**

17. Is your child's TRICARE Prime primary care manager (PCM) based in a military or civilian facility?

- A primary care manager based at a military facility
- A primary care manager based at a civilian facility
- Not sure
- Not a member of TRICARE Prime

-----GETTING HEALTHCARE FROM A SPECIALIST-----

When you answer the next questions, do not include dental visits.

18. Specialists are doctors like surgeons, heart doctors, allergy doctors, skin doctors, and others who specialize in one area of health care.

In the last 12 months, did you or a doctor think your child needed to see a specialist?

- Yes
- No **Go to Question 20**

19. In the last 12 months, how much of a problem, if any, was it to get a referral to a specialist that your child needed to see?

- A big problem
- A small problem
- Not a problem
- My child did not see a specialist in the last 12 months.

20. In the last 12 months, did your child see a specialist?

- Yes
- No **Go to Question 22**

002MMD4K

0122629

21. We want to know your rating of the specialist your child saw most often in the last 12 months, including a personal doctor if he or she was a specialist. Use any number from 0 to 10 where 0 is the worst specialist possible and 10 is the best specialist possible. How would you rate your child's specialist?

- 0 Worst specialist possible
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 Best specialist possible
- My child didn't see a specialist in the last 12 months.

22. In the last 12 months, was the specialist your child saw most often the same doctor as your child's personal doctor?

- Yes
- No
- My child doesn't have a personal doctor or didn't see a specialist in the last 12 months.

YOUR CHILD'S HEALTH CARE IN THE LAST 12 MONTHS

A health provider could be a general doctor, a specialist doctor, a nurse practitioner, a physician assistant, a nurse, or anyone else your child would see for health care.

23. In the last 12 months, did you call a doctor's office or clinic during regular office hours to get help or advice for your child?

- Yes
- No
- Go to Question 25**

24. In the last 12 months, when you called during regular office hours, how often did you get the help or advice you needed for your child?

- Never
- Sometimes
- Usually
- Always
- I didn't call for help or advice for my child during regular office hours in the last 12 months.

25. A health provider could be a general doctor, a specialist doctor, a nurse practitioner, a physician assistant, a nurse, or anyone else your child would see for health care.

In the last 12 months, did you make any appointments for your child with a doctor or other health provider for regular or routine health care?

- Yes
- No
- Go to Question 28**

26. In the last 12 months, how often did your child get an appointment for regular or routine health care as soon as you wanted?

- Never
- Sometimes
- Usually
- Always
- My child didn't need an appointment for regular or routine health care in the last 12 months.

27. In the last 12 months, how many days did your child usually have to wait between making an appointment for regular or routine health care and actually seeing a provider?

- Same day
- 1 day
- 2-3 days
- 4-7 days
- 8-14 days
- 15-30 days
- 31 days or longer
- My child didn't need an appointment for regular or routine care in the last 12 months.

28. In the last 12 months, did your child need an appointment for well-patient care, such as a physical exam or check-up?

- Yes
- No
- Go to Question 31**

002MMD5L

0122629

29. In the last 12 months, when your child needed an appointment for well-patient care, how often did your child get an appointment as soon as you wanted?

- Never
- Sometimes
- Usually
- Always
- My child didn't need an appointment for well-patient care in the last 12 months.

30. In the last 12 months, when your child needed an appointment for well-patient care, how long did your child have to wait between trying to get care and actually seeing a provider?

- Within 7 days
- 8-14 days
- 15-28 days
- More than 28 days
- My child didn't need an appointment for well-patient care in the last 12 months.

31. In the last 12 months, did your child have an illness or injury that needed care right away from a doctor's office, clinic, or emergency room?

- Yes
- No
- Go to Question 34**

32. In the last 12 months, when your child needed care right away for an illness or injury, how often did your child get care as soon as you wanted?

- Never
- Sometimes
- Usually
- Always
- My child didn't need care right away for an illness or injury in the last 12 months.

33. In the last 12 months, how long did your child usually have to wait between trying to get care and actually seeing a provider for an illness or injury?

- Same day
- 1 day
- 2 days
- 3 days
- 4-7 days
- 8-14 days
- 15 days or longer
- My child didn't need to get care right away for an illness or injury in the last 12 months.

34. In the last 12 months, how many times did your child go to an emergency room?

- None
- 1
- 2
- 3
- 4
- 5 to 9
- 10 or more

35. In the last 12 months (not counting times your child went to an emergency room), how many times did your child go to a doctor's office or clinic?

- None
- Go to Question 57**
- 1
- 2
- 3
- 4
- 5-9
- 10 or more

36. In the last 12 months, how much of a problem, if any, was it to get care for your child that you or a doctor believed necessary?

- A big problem
- A small problem
- Not a problem
- My child had no visits in the last 12 months.

37. In the last 12 months, how much of a problem, if any, were delays in your child's health care while you waited for approval from your child's health plan?

- A big problem
- A small problem
- Not a problem
- My child had no visits in the last 12 months.

38. In the last 12 months, how often did your child wait in the doctor's office or clinic more than 15 minutes past the appointment time to see the person your child went to see?

- Never
- Sometimes
- Usually
- Always
- Don't Know
- My child had no visits in the last 12 months.

002MMD6M

0122629

39. In the last 12 months, how often did office staff at your child's doctor's office or clinic treat you and your child with courtesy and respect?

- Never
- Sometimes
- Usually
- Always
- My child had no visits in the last 12 months

40. In the last 12 months, how often were office staff at your child's doctor's office or clinic as helpful as you thought they should be?

- Never
- Sometimes
- Usually
- Always
- My child had no visits in the last 12 months

41. In the last 12 months, how often did your child's doctors or other health providers listen carefully to you?

- Never
- Sometimes
- Usually
- Always
- My child had no visits in the last 12 months

002MMD7N

0122629

50. In the last 12 months, how often did you have your questions answered by your child's doctors or other health providers?

- Never
- Sometimes
- Usually
- Always

We want to know how you, your child's doctors and other health providers make decisions about your child's health care.

51. In the last 12 months, were any decisions made about your child's health care?

- Yes
 - No
- Go to Question 56

52. When decisions were made in the last 12 months, how often did your child's doctors or other health providers offer you choices about your child's health care?

- Never
- Sometimes
- Usually
- Always

53. When decisions were made in the last 12 months, how often did your child's doctors or other health providers discuss with you the good and bad things about each of the different choices for your child's health care?

- Never
- Sometimes
- Usually
- Always

54. When decisions were made in the last 12 months, how often did your child's doctors or other health providers ask you to tell them what choices you prefer?

- Never
- Sometimes
- Usually
- Always

55. When decisions were made in the last 12 months, how often did your child's doctors or other health providers involve you as much as you wanted?

- Never
- Sometimes
- Usually
- Always

56. We want to know your rating of all your child's health care in the last 12 months from all doctors and other health providers.

Use any number from 0 to 10 where 0 is the worst health care possible and 10 is the best health care possible. How would you rate your child's health care?

- 0 Worst health care possible
- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10 Best health care possible
- My child had no visits last 12 months.

57. In the last 12 months, what type of facility did your child go to most often for health care? Select the facility your child used most often.

Please mark only one answer

- A military facility - This includes: Military clinic, Military hospital, PRIMUS clinic, NAVCARE clinic
- A civilian facility - This includes: Civilian doctor's office, Civilian clinic, Hospital, Civilian TRICARE contractor
- Uniformed Services Family Plan Facility (USFHP)
- My child went to none of the listed types of facility in the last 12 months.

58. Is your child now enrolled in any kind of school or daycare?

- Yes
 - No
- Go to Question 61

002MMD80

0122629

59. In the last 12 months, did you need your child's doctors or other health providers to contact a school or daycare center about your child's health or health care?

Yes No Go to Question 61

60. In the last 12 months, did you get the help you needed from your child's doctors or other health providers in contacting your child's school or daycare?

Yes No

-----SPECIALIZED SERVICES-----

61. In the last 12 months, did you get or try to get any special medical equipment or devices for your child, such as a walker, wheelchair, nebulizer, feeding tubes, or oxygen equipment?

Yes No Go to Question 64

62. In the last 12 months, how much of a problem, if any, was it to get special medical equipment for your child?

A big problem
 A small problem
 Not a problem Go to Question 64

63. Did anyone from your child's health plan, doctor's office or clinic help you with this problem?

Yes No

64. In the last 12 months, did you get or try to get special therapy for your child, such as physical, occupational, or speech therapy?

Yes No Go to Question 67

65. In the last 12 months, how much of a problem, if any, was it to get special therapy for your child?

A big problem
 A small problem
 Not a problem Go to Question 67

66. Did anyone from your child's health plan, doctor's office or clinic help you with this problem?

Yes No

67. In the last 12 months, did you get or try to get treatment or counseling for your child for an emotional, developmental or behavioral problem?

Yes No Go to Question 70

68. In the last 12 months, how much of a problem, if any, was it to get this treatment or counseling for your child?

A big problem
 A small problem
 Not a problem Go to Question 70

69. Did anyone from your child's health plan, doctor's office or clinic help you with this problem?

Yes No

70. In the last 12 months, did your child get care from more than one kind of health care provider or use more than one kind of health care service?

Yes No Go to Question 72

71. In the last 12 months, did anyone from your child's health plan, doctor's office or clinic help coordinate your child's care among these different providers or services?

Yes No

-----YOUR CHILD'S HEALTH PLAN-----

The next questions ask about your experience with your child's health plan. Your child's health plan is the one he or she used most in the last 12 months.

72. Claims are sent to a health plan for payment. You may send in the claims yourself, or doctors, hospitals, or others may do this for your child. In the last 12 months, did you or anyone send in any claims for your child to your child's health plan?

Yes
 No Go to Question 76
 Don't know Go to Question 76

002MMD9P

0122629

73. In the last 12 months, how often did your child's health plan handle your child's claims in a reasonable time?

- Never
- Sometimes
- Usually
- Always
- Don't know.
- No claims were sent to my child's health plan in the last 12 months.

74. In the last 12 months, how often did your child's health plan handle your child's claims correctly?

- Never
- Sometimes
- Usually
- Always
- Don't know.
- No claims were sent to my child's health plan in the last 12 months.

75. In the last 12 months, before your child went for care, how often did your child's health plan make it clear how much you would have to pay?

- Never
- Sometimes
- Usually
- Always
- Don't know.
- No claims were sent to my child's health plan in the last 12 months.

76. In the last 12 months, did you look for any information in written materials from your child's health plan?

- Yes
- No Go to Question 78

77. In the last 12 months, how much of a problem, if any, was it to find or understand information in the written materials?

- A big problem
- A small problem
- Not a problem
- I didn't look for information from my child's health plan in the last 12 months.

78. In the last 12 months, did you call the health plan's customer service to get information or help for your child?

- Yes
- No Go to Question 80

79. In the last 12 months, how much of a problem, if any, was it to get the help you needed when you called your child's health plan's customer service?

- A big problem
- A small problem
- Not a problem
- I didn't call my child's health plan's customer service in the last 12 months.

80. In the last 12 months, have you called or written your child's health plan with a complaint or problem?

- Yes
- No Go to Question 83

81. How long did it take for your child's health plan to resolve your complaint?

- Same day
- 2-7 days
- 8-14 days
- 15-21 days
- More than 21 days
- I am still waiting for it to be settled. Go to Question 83
- I haven't called or written with a complaint in the last 12 months. Go to Question 83

82. Was your complaint or problem settled to your satisfaction?

- Yes
- No

83. Paperwork means things like getting your child's ID card, having your child's record changed, processing forms, or other paperwork related to getting care for your child. In the last 12 months, did you have any experiences with paperwork for your child's health plan?

- Yes
- No Go to Question 85

84. In the last 12 months, how much of a problem, if any, did you have with paperwork for your child's health plan?

- A big problem
- A small problem
- Not a problem
- I didn't have any experience with paperwork for my child's health plan in the last 12 months.

|||||
TO THE PARENT OR GUARDIAN OF
JONATHON WILKENSONS I
1245 Q ST STE 400
LINCOLN, NE 68508-1430

Dear Parent/Guardian:

We need your help! The Department of Defense (DoD) is requesting your cooperation in completing a survey of all children of DoD health care beneficiaries aimed at understanding and improving their health care experiences. In a few weeks, you will receive the *Health Care Survey of DoD Beneficiaries for Children* in the mail. The survey includes questions about the health care services your child received in the last 12 months. Your views are important to us and your opinions count. By completing the survey, you will provide important information that will help us improve the health care services for children within the entire DoD health care community. Please take advantage of this opportunity to share your child's experiences by participating in the survey.

Taking part in this survey is voluntary. Your child is among only a few beneficiaries who were randomly selected to participate. As an eligible military beneficiary, your child's benefits under TRICARE include both civilian care and care your child receives within our military facilities. **Even if your child does not receive health care services from a military facility, please still complete the survey.** All the information from the survey is private.

If your address above is incorrect, please telephone the Survey Operations Center at 1-800-866-1821 (within the U.S.) or call collect at 1-402-475-5003 (outside the U.S.) between the hours of 9:00 AM and 7:00 PM EST to give your correct address. You also can send this letter via facsimile with your correct address to 1-800-733-5751. All calls to these numbers are toll free.

Thank you for your service to our country, and thank you in advance for your help!

Sincerely,

Richard D. Guerin, Ph.D.

TO THE PARENT OR GUARDIAN OF
JONATHON WILKENSONS I
1245 Q ST STE 400
LINCOLN, NE 68508-1430

Dear Parent/Guardian:

We need your help! The Department of Defense (DoD) is requesting your cooperation in completing a survey of all children of DoD health care beneficiaries aimed at understanding and improving their health care experiences. By completing the *Health Care Survey of DoD Beneficiaries for Children*, you will provide key information that will help us improve the health care services for the children of the entire DoD health care community. Please take advantage of this opportunity to share your child's experiences by participating in the survey.

Enclosed is a survey that asks your opinions about the health care services your child received in the past 12 months. You may also complete the questionnaire on-line by connecting to <http://quest.telesage.com/dod-ben-child>. Your personal password is 123ABC. Your views are important to us and your opinions count. As an eligible military beneficiary, your child's benefits under TRICARE include both civilian care and care your child receives within our military facilities. **Even if your child did not receive their health care from a military facility, please still complete the survey.**

Taking part in this survey is voluntary. Your child is among only a few military beneficiaries who were randomly selected to participate. All you and your child's contact information and what you have to say are private.

We hope you will take this chance to tell us about your child's health care experience. Please return the completed survey in the enclosed postage-paid envelope within the next 7 days. If your address above is incorrect, please telephone the Survey Operations Center at 1-800-866-1821 (within the U.S.) or call collect at 1-402-475-5003 (outside the U.S.) between the hours of 9:00 AM and 7:00 PM EST to give your correct address. You also can send this letter via facsimile with your correct address to 1-800-733-5751. All calls to these numbers are toll free.

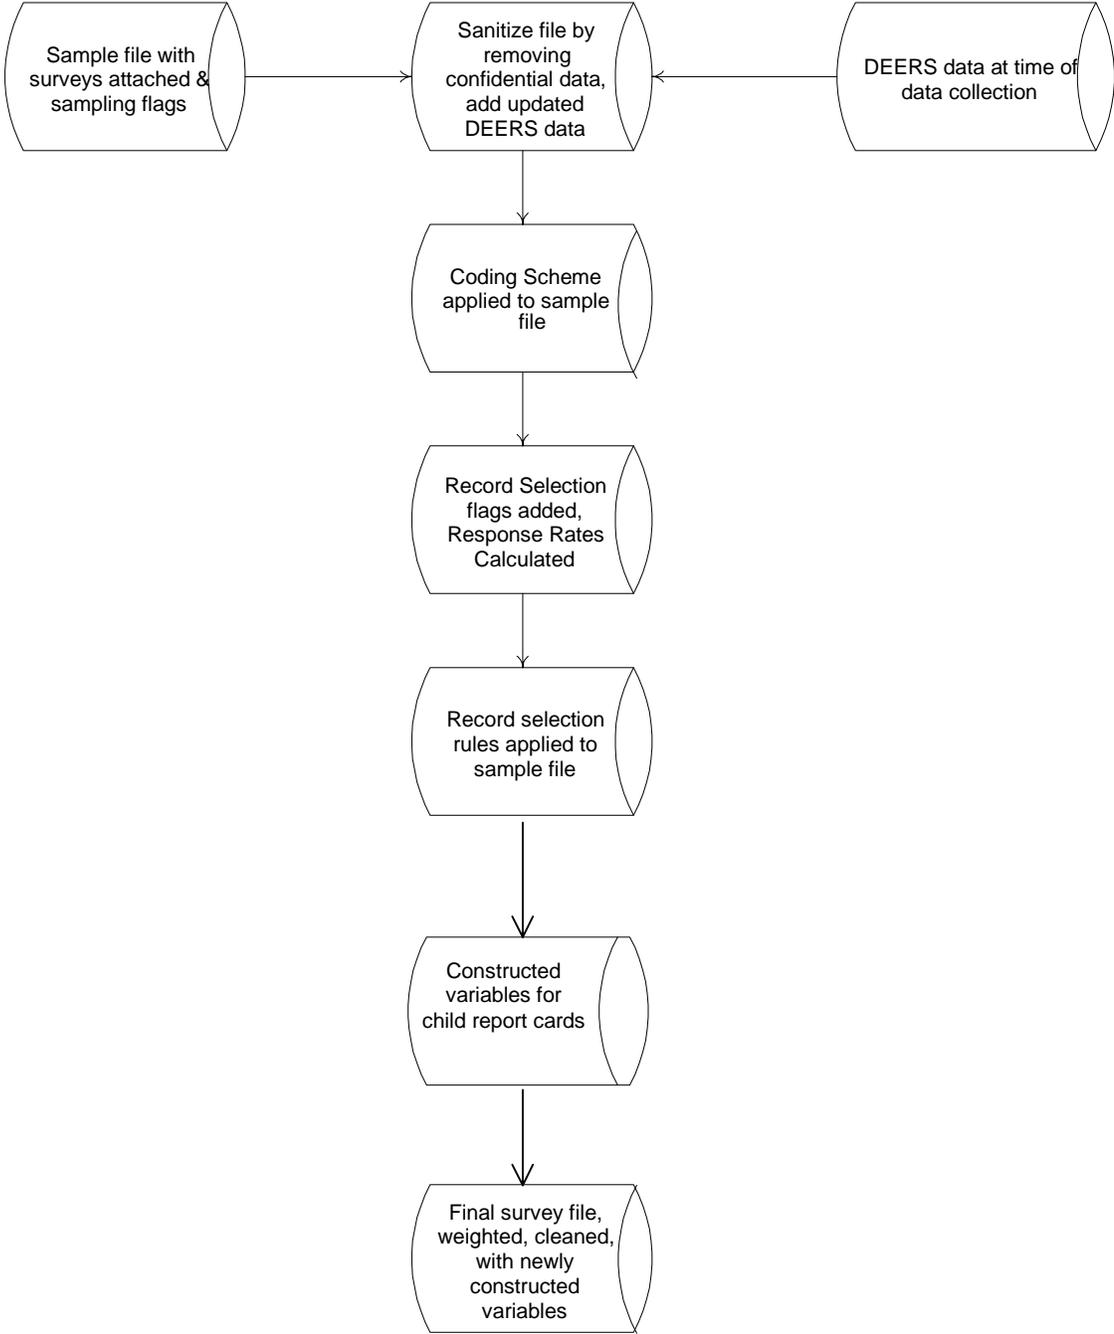

Thank you for your service to our country. Your child's experience as a military beneficiary needs to be heard. Thank you for your help.

54	C03012	Num	4	205	CYN2_.	11.	Dr undrstnds med/beh/oth affct fmly life
55	C03013	Num	4	209	CRATE1_.	11.	Rating of childs personal Dr/Nurse
56	C03014	Num	4	213	CYN3_.	11.	Does child have primary care manager
57	C03015	Num	4	217	CYN6_.	11.	Know name of childs Primary care mgr
58	C03016	Num	4	221	CPR0B2_.	11.	In last 12 mos how much prblm to see PCM
59	C03017	Num	4	225	CWORK.	11.	Is primary care mgr military or civilian
60	C03018	Num	4	229	CYN2_.	11.	Did you think child needed to see splclst
61	C03019	Num	4	233	CPR0B3_.	11.	How much prblm to get referral to splclst
62	C03020	Num	4	237	CYN2_.	11.	In last 12 mos did child see specialist
63	C03021	Num	4	241	CRATE2_.	11.	Rating of specialist seen most often
64	C03022	Num	4	245	CYN4_.	11.	Specialist same as personal Dr
65	C03023	Num	4	249	CYN2_.	11.	Call during reg. Hrs to get help/advice
66	C03024	Num	4	253	COFTN2_.	11.	Called during reg Hrs did you get hlp
67	C03025	Num	4	257	CYN2_.	11.	Make appt for regular/routine hlthcre
68	C03026	Num	4	261	COFTN3_.	11.	How oftn get appt for care soon as wnted
69	C03027	Num	4	265	CDAYS1_.	11.	Wait btwn mking appt and seeing provider
70	C03028	Num	4	269	CYN2_.	11.	Appointment for well-patient care
71	C03029	Num	4	273	COFTN5_.	11.	Get appt for well-patient care
72	C03030	Num	4	277	CLONG.	11.	Wait to see provider for well-patnt care
73	C03031	Num	4	281	CYN2_.	11.	Have illness/injury need care right away
74	C03032	Num	4	285	COFTN4_.	11.	Get needed care as soon as wanted
75	C03033	Num	4	289	CDAYS3_.	11.	Wait btwn trying to & seeing provider
76	C03034	Num	4	293	CTIMES.	11.	Times to ER
77	C03035	Num	4	297	CDOCCLIN.	11.	Times to Dr office/Clinic (excluding ER)
78	C03036	Num	4	301	CPR0B4_.	11.	Problem to get necessary care
79	C03037	Num	4	305	CPR0B4_.	11.	Problem wait for approval
80	C03038	Num	4	309	COFTN6_.	11.	How oftn wait >15 mins
81	C03039	Num	4	313	COFTN6_.	11.	How oftn staff treat w/courtesy &respect
82	C03040	Num	4	317	COFTN6_.	11.	How oftn were staff helpful
83	C03041	Num	4	321	COFTN6_.	11.	How oftn did staff listen carefully
84	C03042	Num	4	325	COFTN6_.	11.	How oftn did staff explain things to you
85	C03043	Num	4	329	COFTN6_.	11.	How oftn staff respect what had to say
86	C03044	Num	4	333	CYN2_.	11.	Child able to talk to Dr
87	C03045	Num	4	337	COFTN7_.	11.	Dr explain in way for child to undrstnd
88	C03046	Num	4	341	COFTN7_.	11.	How oftn spend enough time w/child
89	C03047	Num	4	345	CYN2_.	11.	Questions/concerns about childs hlth/care
90	C03048	Num	4	349	COFTN9_.	11.	How oftn Dr make it easy discuss cncrns
91	C03049	Num	4	353	COFTN9_.	11.	How oftn get specific info from Dr
92	C03050	Num	4	357	COFTN9_.	11.	How oftn your questions answered by Dr
93	C03051	Num	4	361	CYN2_.	11.	Last 12 mos, childs hlthcr decsns made
94	C03052	Num	4	365	COFTN9_.	11.	How oftn Dr offer choices childs hlthcr
95	C03053	Num	4	369	COFTN9_.	11.	How oftn Dr dscss gd/bad chld hlthcr cho
96	C03054	Num	4	373	COFTN9_.	11.	How oftn Dr ask for choice preference
97	C03055	Num	4	377	COFTN9_.	11.	How oftn Dr involve you as much as wntd
98	C03056	Num	4	381	CRATE3_.	11.	Rating of childs healthcare
99	C03057	Num	4	385	CTYPE.	11.	Type of facility child used most often
100	C03058	Num	4	389	CYN2_.	11.	Child enrolled in school/daycare
101	C03059	Num	4	393	CYN2_.	11.	Need Dr to contact school/daycare
102	C03060	Num	4	397	CYN2_.	11.	Get help from Dr to contact schl/dycr
103	C03061	Num	4	401	CYN2_.	11.	Get spcial med equipmnt for child
104	C03062	Num	4	405	CPR0B8_.	11.	Problem get spcial med equip/devices
105	C03063	Num	4	409	CYN2_.	11.	Help get spcial med equip/dev
106	C03064	Num	4	413	CYN2_.	11.	Try special therapy for child
107	C03065	Num	4	417	CPR0B8_.	11.	Problem get special therapy
108	C03066	Num	4	421	CYN2_.	11.	Help get spcial therapy
109	C03067	Num	4	425	CYN2_.	11.	Get treatmnt emotnl/dvlop/behav prob
110	C03068	Num	4	429	CPR0B8_.	11.	Problem get treatmnt emotnl/devel/behav
111	C03069	Num	4	433	CYN2_.	11.	Help get treatmnt emotnl/devel/behav pro

The CONTENTS Procedure

-----Variables Ordered by Position-----

#	Variable	Type	Len	Pos	Format	Informat	Label
112	C03070	Num	4	437	CYN2_.	11.	Use more thn one kind prvder/hlth srvice
113	C03071	Num	4	441	CYN2_.	11.	Anyone help coordinate child's care
114	C03072	Num	4	445	CYN1_.	11.	Send in any claims
115	C03073	Num	4	449	COFTN8_.	11.	Handle claim in reasonable time
116	C03074	Num	4	453	COFTN8_.	11.	Handle claim correctly
117	C03075	Num	4	457	COFTN8_.	11.	Plan make clear how much to pay
118	C03076	Num	4	461	CYN2_.	11.	Look for info/written material
119	C03077	Num	4	465	CPR0B5_.	11.	Find/understand info in written material
120	C03078	Num	4	469	CYN2_.	11.	Call customer service to get info
121	C03079	Num	4	473	CPR0B6_.	11.	Problem get help when call customer svc
122	C03080	Num	4	477	CYN2_.	11.	Called/written plan with complaint
123	C03081	Num	4	481	CSOLVE2_.	11.	How long to resolve complaint
124	C03082	Num	4	485	CYN2_.	11.	Complaint/problem settled to satisfction
125	C03083	Num	4	489	CYN2_.	11.	Experience with paperwork
126	C03084	Num	4	493	CPR0B7_.	11.	Problem with paperwork
127	C03085	Num	4	497	CRATE4_.	11.	Rating of expriceience with child hlth plan
128	C03086	Num	4	501	CYN2_.	11.	Get prescription/refill
129	C03087	Num	4	505	CPR0B8_.	11.	Problem prescription/refill
130	C03088	Num	4	509	CYN2_.	11.	Help get prescription/refill
131	C03089	Num	4	513	CHEALTH.	11.	Rate child overall health
132	C03090	Num	4	517	CYN2_.	11.	Child use medicine prescribed by Dr
133	C03091	Num	4	521	CYN2_.	11.	Medicine b/c medical,behavioral,other
134	C03092	Num	4	525	CYN2_.	11.	Medicine b/c cndtn expected last>=12 mos
135	C03093	Num	4	529	CYN2_.	11.	Mre medical,mntl,education svcs thn usua
136	C03094	Num	4	533	CYN2_.	11.	Use svcs b/c medical, behavioral, oth
137	C03095	Num	4	537	CYN2_.	11.	Svcs b/c condition expected last>=12 mos
138	C03096	Num	4	541	CYN2_.	11.	Limited/prevented in ability
139	C03097	Num	4	545	CYN2_.	11.	Limited b/c medical, behavioral, other
140	C03098	Num	4	549	CYN2_.	11.	Limited b/c condition expected last>=1yr
141	C03099	Num	4	553	CYN2_.	11.	Get special therapy
142	C03100	Num	4	557	CYN2_.	11.	Therapy b/c medical, behavioral, other
143	C03101	Num	4	561	CYN2_.	11.	Therapy b/c condition expected last>=1yr
144	C03102	Num	4	565	CYN2_.	11.	Problem for which gets trtmnt/counseling
145	C03103	Num	4	569	CYN2_.	11.	Trtmnt/counseling b/c conditn last>=1yr
146	C03104	Num	4	573	CSEX.	11.	Is child male or female
147	C03105	Num	4	577	CHISP.	11.	Is child Hispanic/Latino
148	C03106A	Num	4	581	CMARK.	11.	Child race:White
149	C03106B	Num	4	585	CMARK.	11.	Child race:Black

WEB SPECIFICATIONS FOR CHILD TRICARE BENEFICIARY REPORTS

CHILD TRICARE BENEFICIARY REPORTS

The findings from the child HCSDB are presented in the Child TRICARE Consumer Reports. This section provides background on the HCSDB for children and describes the structure and content of the Child Consumer Reports.

1. Background

The 2003 HCSDB questionnaire for children closely resembles the 2002 questionnaire, which includes questions from the CAHPS 2.0H survey instruments. This correspondence between surveys allows us to compare findings for children in the MHS with findings from the previous year and with findings from the National CAHPS Benchmarking Database (NCBD), which contains responses of privately insured children in the civilian sector. Most questions in the child survey are identical to the CAHPS questions, and some are unique to issues related to TRICARE. Most topics in the Consumer Reports are based on the CAHPS questions.

The sample for the HCSDB for children is stratified by three TRICARE Prime enrollment groups, three geographic areas, and three age groups:

- TRICARE Prime Enrollment. Children enrolled in Prime or not enrolled in Prime.
- Geographic Areas. Children residing in one of three geographic areas organized to reflect the relative maturity of the TRICARE Prime health plan in each regional group. The areas are referred to as new regions, where Prime was most recently implemented (Regions 1, 2, and 5); mature regions, where Prime is most “mature” (Regions 6, 9-12, and Alaska); and other regions (Regions 3, 4, and 7/8).
- Age Group. Children under age 6, ages 6 to 12, and ages 13 to 17.

2. Format

Like the Adult Consumer Reports, the Child Consumer Reports is produced in a tabular format. The reports cover the following four topics related to pediatric care in the MHS:

- Ease of Access
- Communication and Customer Service
- Parents' Satisfaction Ratings
- Primary Care Manager

Table I lists the CAHPS composite measures and overall ratings and the items that make up each of them. Table II lists the questions making up a composite measure of the respondents' experience with their primary care managers. Question numbers are from the 2003 Child HCSDB.

TABLE I

CAHPS 2.0 H COMPOSITE AND RATING QUESTIONS AND
RESPONSE CHOICES

GETTING NEEDED CARE		RESPONSE CHOICE
Q6	With the choices your child's health plan gave you, how much of a problem, if any, was it to get a personal doctor or nurse for your child you are happy with?	A big problem A small problem Not a problem
Q19	In the last 12 months, how much of a problem, if any, was it to get a referral to a specialist that your child needed to see?	A big problem A small problem Not a problem
Q36	In the last 12 months, how much of a problem, if any, was it to get the care for your child that you or a doctor believed necessary?	A big problem A small problem Not a problem
Q37	In the last 12 months, how much of a problem, if any, were delays in your child's health care while you waited for approval from your child's health plan?	A big problem A small problem Not a problem
GETTING CARE QUICKLY		
Q24	In the last 12 months, when you called during regular office hours, how often did you get the help or advice you needed for your child?	Never Sometimes Usually Always
Q26	In the last 12 months, how often did your child get an appointment for regular or routine health care as soon as you wanted?	Never Sometimes Usually Always
Q32	In the last 12 months, when your child needed care right away for an illness or injury, how often did your child get care as soon as you wanted?	Never Sometimes Usually Always
Q38	In the last 12 months, how often did your child wait in the doctor's office or clinic more than 15 minutes past the appointment time to see the person your child went to see?	Never Sometimes Usually Always

TABLE I (continued)

	HOW WELL DOCTORS COMMUNICATE	RESPONSE CHOICE
Q41	In the last 12 months, how often did your child's doctors or other health providers listen carefully to you?	Never Sometimes Usually Always
Q42	In the last 12 months, how often did your child's doctors or other health providers explain things in a way you could understand?	Never Sometimes Usually Always
Q43	In the last 12 months, how often did your child's doctors or other health providers show respect for what you had to say?	Never Sometimes Usually Always
Q45	In the last 12 months, how often did your child's doctors or other health providers explain things in a way your child could understand?	Never Sometimes Usually Always
Q46	In the last 12 months, how often did doctors or other health providers spend enough time with your child?	Never Sometimes Usually Always
	COURTEOUS AND HELPFUL OFFICE STAFF	
Q39	In the last 12 months, how often did office staff at your doctor's office or clinic treat you and your child with courtesy and respect?	Never Sometimes Usually Always
Q40	In the last 12 months, how often were office staff at your child's doctor's office or clinic as helpful as you thought they should be?	Never Sometimes Usually Always
	CLAIMS HANDLING	
Q73	In the last 12 months, how often did your child's health plan handle your child's claims in a reasonable time?	Never Sometimes Usually Always
Q74	In the last 12 months, how often did your child's health plan handle your child's claims correctly?	Never Sometimes Usually Always
	CUSTOMER SERVICE	
Q77	In the last 12 months, how much of a problem, if any, was it to find or understand information in the written materials?	A big problem A small problem Not a problem
Q79	In the last 12 months, how much of a problem, if any, was it to get the help you needed when you called your child's health plan's customer service?	A big problem A small problem Not a problem
Q84	In the last 12 months, how much of a problem, if any, did you have with paperwork for your child's health plan?	A big problem A small problem Not a problem

TABLE I (continued)

RATING OF ALL HEALTH CARE		RESPONSE CHOICE
Q56	We want to know your rating of all your child's health care in the last 12 months from all doctors and other health providers. Use any number from 0 to 10 where 0 is the worst health care possible, and 10 is the best health care possible. How would you rate all your child's health care.	0 Worst health care possible 1 2 3 4 5 6 7 8 9 10 Best health care possible
RATING OF HEALTH PLAN		
Q85	We want to know your rating of all your experience with your child's health plan. Use any number from 0 to 10 where 0 is the worst health plan possible, and 10 is the best health plan possible. How would you rate your child's health plan now?	0 Worst health plan possible 1 2 3 4 5 6 7 8 9 10 Best health plan possible
RATING OF SPECIALIST		
Q21	We want to know your rating of the specialist your child saw most often in the last 12 months, including a personal doctor if he or she was a specialist. Use any number from 0 to 10 where 0 is the worst specialist possible, and 10 is the best specialist possible. How would you rate your child's specialist?	0 Worst specialist possible 1 2 3 4 5 6 7 8 9 10 Best specialist possible

TABLE I (continued)

RATING OF PERSONAL DOCTOR		
Q13	<p>We want to know your rating of your child's personal doctor or nurse. If your child has more than one personal doctor or nurse, choose the person your child sees most often.</p> <p>Use any number from 0 to 10 where 0 is the worst personal doctor or nurse possible, and 10 is the best personal doctor or nurse possible. How would you rate your child's personal doctor or nurse now?</p>	<p>0 Worst personal doctor or nurse possible</p> <p>1</p> <p>2</p> <p>3</p> <p>4</p> <p>5</p> <p>6</p> <p>7</p> <p>8</p> <p>9</p> <p>10 Best personal doctor or nurse possible</p>

TABLE II

PRIMARY CARE MANAGER COMPOSITE RATING QUESTIONS AND
RESPONSE CHOICES

	TRICARE PRIME-PRIMARY CARE MANAGER	RESPONSE CHOICE
Q14	For members of TRICARE Prime, the primary point of contact regarding your child's health is called a primary care manager, or PCM. This may be the same person as your child's personal doctor or nurse. Does your child have a TRICARE primary care manager?	Yes No
Q15	Do you know the name of your child's TRICARE Prime care manager?	Yes No
Q16	In the last 12 months, how much of a problem was it for your child to see his or her TRICARE primary care manager?	A big problem A small problem Not a problem

3. Technical Description

a. Electronic Reporting

The Child Consumer Reports are designed to appear on the TMA web site. The reports consist of tables in two levels. The first level shows composite scores and ratings and the second level provides more information about scores in the first level. The second level contains tables presenting the questions making up a composite and tables comparing current scores with scores from previous years. The reports exist in an electronic format that allows the reader to drill down through the column headings in the first-level reports to obtain further detail on the reported composite scores. Readers are able to print the reports locally.

The reader accesses the report card through a menu presented on its index page. The menu requires the reader to first choose the geographic area of interest: CONUS MHS overall or aggregate findings for “new” regions (1, 2, and 5), “mature” regions (6, 9-12, and Alaska), or “other” regions (3, 4, and 7/8).

b. First-Level Report

In the first-level tables, the composite measures or average ratings for each topic are displayed for three age groups and four enrollment groups. The three age groups are under age 6, 6 to 12 years, and 13 to 17 years. The enrollment groups are enrolled in TRICARE Prime, enrolled in TRICARE Prime with a military PCM, enrolled in TRICARE Prime with a civilian PCM, and not enrolled in TRICARE Prime.

In most cases, CAHPS 2.0H version composites are used so that findings for children in the MHS can be compared with findings from the NCBD. Composites are calculated as the average of provider proportions as are composites from the adult survey. Benchmarks based on CAHPS data are shown alongside the results of the survey or each of the two younger age groups, but not for children age 13 to 17 because children of that age are not included in the NCBD. Benchmarks are taken from the 2001 NCBD because more responses are available from that year than from 2002.

In addition to these CAHPS composites, an additional composite measure describing respondents' experiences with their child's primary care manager is included. This score is calculated as the weighted average of the proportions expressing satisfaction with different aspects of their and their child's relationship with the child's personal doctor.

Parents' satisfaction with their children's care is the only aspect of care presented not as a composite score but as a rating (on a scale from 0 to 100, where 0 is worst and 100 is best). Parents' ratings of their child's personal doctor or nurse, their child's specialist, all the child's health care, and the child's health plan are displayed. Scores based on parents' ratings are the proportion giving a rating of 8 or above.

c. Second-Level Reports

Clicking on the column headings for composite scores in the first-level consumer report brings up a table showing findings for each aspect of care in a composite measure. These results are presented as weighted survey estimates for the same enrollment and age groups in the first-level report. There are no reports breaking down composite scores for the parents' satisfaction ratings, since each first-level rating represents the findings for a unique survey question.

By clicking on one of the buttons labeled Trend in the first row beneath the column headings in a first-level report, users are taken to another second-level table that shows the current scores for a rating or composite compared to previous year's.

APPENDIX G

SAS CODE

G.1 - ..\ReportCards\CAHPS_ChildQ32003\STEP1C.SAS - Construct Variables for the TRICARE Beneficiary Reports.

```

*****
*
* PROJECT: DoD - Annual Child Report Cards
* PROGRAM: STEP1C.SAS
* PURPOSE: Create Dummy and Recode Variables used in Child Report Card
*          Create a Female dummy variable
*          Create an Education dummy variable
*          Create 3 super region dummy variables.
*          Create 3 age dummy variables.
*
*          We require the most desired code to be the highest value.
*          Recode the dependent variables into:
*          1 - the least desirable value
*          2 - the 2nd least desirable value
*          3 - the most desirable value
*          . - missing
*
*          Create 7 variables GROUP1 - GROUP7;
*          IF XINS_COV = 1 AND C03003=4 THEN GROUP1 = 1;
*          IF XENR_PCM = 1 AND C03003=4 THEN GROUP2 = 1;
*          IF XENR_PCM = 2 AND C03003=4 THEN GROUP3 = 1;
*          IF XINS_COV IN (2,3) THEN GROUP4 = 1;
*          IF AGEUND6 = 1 THEN GROUP5 = 1;
*          IF AGE0612 = 1 THEN GROUP6 = 1;
*          IF AGE1317 = 1 THEN GROUP7 = 1;
*          GROUP8 is output for all beneficiaries
*
* MODIFIED: 1) February 2001 By Keith Rathbun, Update for quarterly
*           adult report cards. Removed permanent dataset ENTIRE.SD2.
*           2) August 2001 By Keith Rathbun, Updated for 3rd quarter
*           2000 child report cards.
*           3) October 2002 By Mike Scott, Updated for 3rd quarter
*           2002 child report cards.
*           4) September 2003 By Keith Rathbun, Updated for 3rd quarter
*           2003 child report cards.
*           5) November 2003 By Mike Scott, Added V612 to LIBNAME statements.
*           Pointed to CONVERT.SAS on DOD computer instead of J:, updated
*           for 3rd quarter 2003 child report cards.
*
* INPUTS: 1) HCS03C_1.SD2 - DoD Q3 2003 HCS Database
*
* OUTPUTS: 1) GROUP1-8.SD2 - DoD Q3 2003 GROUP files as defined above

```

/*****
/* Project: DoD - 2003 Child Report Cards
/* Program: STEP2C.SAS
/* Purpose: 2003 Child Report Card
/* Requires program STEP1C.SAS to have been run
/*
/* Modified: 1) August 2001 By Keith Rathbun, Updated for Q3 2000
/*           Child Report Cards.
/*           2) October 2002 By Mike Scott, Updated for Q3 2002
/*           Child Report Cards. Changed INTERCEP to INTERCEPT.
/*           Added V612 to LIBNAME statements.
/*           3) September 2003 By Keith Rathbun, Updated for Q3 2003
/*           Child Report Cards.
/*
/* Programming specifications for Child report card
/* The Child report card contains a large number of
/* risk-adjusted scores. Some scores are
/* calculated from responses to individual survey questions.
/* Composite scores are calculated by
/* combining scores from individual questions.
/* The scores then are compared with external civilian
/* benchmarks. The programming tasks involved in building
/* the report card are:
/*     1) preparing data for analyses
/*     2) estimating risk adjustment models
/*     3) calculating risk-adjusted values and variances
/*     4) calculating benchmarks
/*     5) comparing risk-adjusted values to benchmarks
/*         and hypothesis testing
/*
/* SUBGROUPS

G.4.1 - ..\LOADWEB\CAHPS_ChildQ32003\LOADCAHC.SAS - Convert the CAHPS Scores Database into the WEB layout.

```
*****
*
* PROGRAM:   LOADCAHC.SAS
* TASK:     2003 DOD HEALTH CARE SURVEY REPORT CARDS (8860-410)
* PURPOSE:  Convert the CAHPS Scores Database into the WEB layout
*
* WRITTEN:  07/14/2000 BY KEITH RATHBUN
*
* MODIFIED:
*
* 1) 08/24/2001 BY KEITH RATHBUN to support the Q3 2000 child report cards.
* 2) 10/30/2002 BY MIKE SCOTT to support the Q3 2002 child report cards.
* 3) 09/18/2003 BY KEITH RATHBUN to support the Q3 2003 child report cards
*
* INPUTS:   1) CAHPS Individual and Composite data sets with adjusted scores
*
* OUTPUT:   1) LOADCAHC.SD2 - Combined CAHPS Scores Database in WEB layout
*
* INCLUDES: 1) LOADCAHC.INC - Format definitions for CAHPS Individual
*             and composite data sets
*
* NOTES:
*
* 1) The following steps need to be run prior to this program:
*   - STEP1C.SAS - Recode questions and generate group files
*   - STEP2C.SAS - Calculate individual adjusted scores for group 1-7
*   - COMPOSIT.SAS - Calculate composite adjusted scores for group 1-8
*
* 2) The output file (LOADCAHC.SD2) will be run through the
*   MAKEHTMC.SAS program to generate the WEB pages.
*
* 3) This program is a modified version of LOADCAHP.SAS adapted to meet
*   the requirements of the child report card.
*

G.7.1 - ..\Benchmark\BENCHC01.SAS - Extract CAHPS Questions and assign them names consistent with MPR survey variables.

```

*****
*
* PROGRAM:  BENCHC01.SAS
* TASK:    2003 DOD HEALTH CARE SURVEY ANALYSIS (8860-410)
* PURPOSE: Extract 2001 Child CAHPS Questions
*
* WRITTEN: 07/14/2000 BY KEITH RATHBUN
*
* MODIFIED: 1) 09/05/2001 BY KEITH RATHBUN, Updated variable names to
*            accommodate the 2000 Q3 Child DOD survey.  Removed unnecessary
*            references to C99D65.
*            2) 10/05/2001 BY KEITH RATHBUN, Added specialty care (C00016).
*            3) 10/31/2002 BY MIKE SCOTT, Updated variable names to
*            accommodate the 2002 Q3 Child DOD survey.
*            4) 12/03/2003 BY MIKE SCOTT, Updated variable and question names
*            for Q3 2003 Child survey. Deleted line in first data step:
*            IF CC37=. THEN CC38=. Added code to make PRODUCT numeric for
*            NEST statement in BENCHC03_5. Added V612 to libnames.
*
* INPUTS:  1) CC_2001M.SD2 - 2001 Child CAHPS Questions
*
* OUTPUT:  1) BENCHC01.SD2 - 2001 Child CAHPS Questions Renamed to be
*            consistent with the 2003 Q3 Child DOD Survey.
*
* NOTES:
*
* 1) This program will generate the input for BENCHC02.SAS.
*

```
*****
*
* PROGRAM:  BENCHC03.SAS
* TASK:    2003 DOD HEALTH CARE SURVEY ANALYSIS (8860-410)
* PURPOSE: Recode 2001 Child CAHPS Questions
*
* WRITTEN:  June 2000 BY ERIC SCHONE
*
* MODIFIED: 1) June 2000 BY KEITH RATHBUN - Output permanent datasets with
*           scores and standard errors and process the rest of the
*           composites and ratings.
*           2) July 2000 BY KEITH RATHBUN - Update macro calls for child
*           survey. Update to accommodate a 5th dependent variable.
*           3) September 2001 BY KEITH RATHBUN - Update macro calls for 2000
*           Q3 Child survey. Let wgt = wrwt. Update libnames. Added
*           specialty care.
*           4) October 2002 BY MIKE SCOTT, Updated variable names to
*           accommodate the 2002 Q3 Child DOD survey. Changed INTERCEP
*           to INTERCEPT.
*           5) December 2003 BY MIKE SCOTT, Updated variable names and libnames
*           for Q3 2003 Child survey. Pointed to CONVERT.SAS on DOD computer
*           instead of J:. Added v612 to libnames. Added 03073 and 03074
*           to %CONT3 call. Added code block at end of program for Claims
*           Processing. Set %COMP parameter to 6, and changed other
*           parameters from 6-9 to 7-10.
*
* INPUT:    1) BENCHC02.SD2 - 2001 Child CAHPS Questions Renamed to be
*           consistent with the 2003 Q3 Child DOD Survey.
*
* OUTPUTS:  1) Benchmark Composite Scores Data Sets
*
* INCLUDES: 1) CONVERT.SAS - Convert item responses to proportional values
*           for consistency with TOPS.
*
* NOTES:
*
* 1) Run this program after BENCHC02.SAS.
* 2) This program will generate the input for BENCHC04.SAS.

G.7.5 - ..\Benchmark\BENCHC04.SAS - Convert the CAHPS Benchmark Scores Database into the WEB layout.

```
*****
*
* PROGRAM:   BENCHC04.SAS
* TASK:     2003 DOD HEALTH CARE SURVEY ANALYSIS (8860-410)
* PURPOSE:  Convert the Benchmark Scores Database into the WEB layout
*
* WRITTEN:  07/17/2000 BY KEITH RATHBUN
*
* MODIFIED: 1) September 2001 BY KEITH RATHBUN - Update macro calls for 2000
*           Q3 Child survey. Updated libnames and file references.
*           2) 10/05/2001 BY KEITH RATHBUN, Added specialty care (C00016).
*           3) 10/31/2002 BY MIKE SCOTT, Updated variable names to
*           accommodate the 2002 Q3 Child DOD survey.
*           4) 11/24/2003 BY MIKE SCOTT, Updated variable names and libnames
*           for Q3 2003 Child survey.
*           5) 12/06/2003 BY MIKE SCOTT, Added %PROCESS call at end of program
*           for Claims Processing. Set CNUM parameter to 6, and changed
*           CNUMs after that from 6-9 to 7-10. Added COMP10_5 and COMP10_6
*           to SET statement at end of program.
*
* INPUTS:   1) Benchmark data sets with adjusted scores
*           (COMPn_i.SD2 where n = composite number and i = group number)
*
* OUTPUT:   1) BENCHC04.SD2 - Combined Benchmark Scores Database in WEB layout
*
* INCLUDES: 1) LOADCAHC.INC - Format definitions for CAHPS Individual
*           and composite data sets
*
* NOTES:
*
* 1) The following steps need to be run prior to this program:
*   - BENCHC01.SAS - Extract Benchmark variables
*   - BENCHC02.SAS - Recode Benchmark variables
*   - BENCHC03.SAS - Construct Scores and SEMEAN datasets
*
* 2) The output file (BENCHC04.SD2) will be run through the
*   MAKEHTML.SAS program to generate the WEB pages.
*
* 3) The child-based CAHPS composite measures are based on children 12
*   years old or younger. Therefore, we will only produce benchmarks
*   for groups 5 (Under Age 6) and 6 (6-12 Years).
*

*
* PROJECT: 8860 - 2003 Annual Child Survey
* PROGRAM: FAKEC.SAS
* PURPOSE: Generate Fake Data for Report Cards
* AUTHOR:  Natalie Justh
*
* MODIFIED: 1) 10/5/2001 By Keith Rathbun to accommodate 2000 version
*           of the child report card layout file. Added YEAR
*           parameter for ease of maintenance. Deleted Attitudes
*           Toward TRICARE Prime and added Speciality Care and
*           Claims Processing. Removed unnecessary code used to
*           assign SCORE and SIG values.
*
*           2) 10/18/2001 By Chris Rankin to change the order that
*           the data appear in the report cards.
*
*           3) 11/1/2002 By Mike Scott and Keith Rathbun to
*           accommodate the 2002 version of the child report card
*           layout file.
*
*           4) 12/3/2003 By Mike Scott - Updated for Q3 2003.

G.9 - ..\LOADWEB\MERGFINC.SAS - Merge the final CAHPS and MPR Scores Databases into the WEB layout.

```

*****
*
* PROGRAM:  MERGFINC.SAS
* TASK:     2003 DOD HEALTH CARE SURVEY REPORT CARDS (8860-410)
* PURPOSE:  Merge the final CAHPS and MPR Scores Databases
*           into the WEB layout preserving the order of the FAKEC.SD2.
*
* WRITTEN:  06/07/2000 BY KEITH RATHBUN
*
* INPUTS:   1) MPR and CAHPS Individual and Composite data sets with adjusted
*           scores, and benchmark data for 2003 DoD HCS.
*           - LOADMPRC.SD2 - MPR Scores Database
*           - LOADCAHC.SD2 - CAHPS Scores Database
*           - BENCHC04.SD2 - 2001 CAHPS Benchmark Database
*           - FAKEC.SD2   - WEB Layout in Column order
*
* OUTPUT:   1) MERGFINC.SD2 - Combined Scores Database in WEB layout
*
* MODIFIED: 1) 07/24/2000 By Keith Rathbun - Adapted from MERGFINL.SAS to
*           reflect the requirements of the Child Report Card.
*           2) 08/24/2001 By Keith Rathbun - Updated for Q3 2000 Child
*           Report Cards.
*           3) 10/31/2002 By Mike Scott and Keith Rathbun - Updated for
*           Q3 2002 Child Report Cards. Recoded BENTYPE, and deleted
*           recoding for ROWCAT.
*           4) 12/06/2003 By Mike Scott - Updated for Q3 2003.
*
* NOTES:
*
* 1) The following steps need to be run prior to this program:
*   - STEP1C.SAS      - Recode questions and generate CAHPS group files
*   - STEP2C.SAS      - Calculate CAHPS individual adjusted scores for groups 1-8
*   - COMPOSIT.SAS    - Calculate composite adjusted scores for group 1-8
*   - MPRCOMPC.SAS    - Calculate MPR individual and composite scores
*   - LOADMPRC.SAS    - Load MPR individual and composite scores into WEB layout
*   - BENCHC01-04.SAS - Convert 1999 Benchmark Scores into WEB layout
*   - LOADCAHC.SAS    - Convert 2000 CAHPS Scores Database into WEB layout
*
* 2) The output file (MERGFINC.SD2) will be run through the
*   MAKEHTMC.SAS program to generate the WEB pages.

/*****
The following MACRO creates the macro calls for MKHTML which will create XLS
files if outxls=1. There are four groups (All CONUS MHS CHILDREN; CHILDREN IN
REGIONS 1,2,& 5; Children in Regions 6, 9-12 & Alaska; and Children in
Regions
3, 4 & 7/8. For each region, there are 11 RATINGS: (GETTING NEEDED CARE, GETTING
CARE
QUICKLY, HOW WELL DOCTORS COMMUNICATE, CLAIMS PROCESSING, COURTEOUS AND HELPFUL
OFFICE STAFF, CUSTOMER SERVICE, PERSONAL DOCTOR OR NURSE, HEALTH CARE, SPECIALTY
CARE,
HEALTH PLAN, and PRIMARY CARE MANAGER).

THE FIRST PARAMATER IN THE MACRO CALL INDICATES THE GROUP, THE THIRD PARAMATER
INDICATES THE RATING, and since the trend pages appear on the same spreadsheet
as the subbenefit information there is no need to specify the fourth paramater
as anything other than zero

The following MACRO creates the macro calls for MKHTML. There are four  
groups (All CONUS MHS CHILDREN; CHILDREN IN REGIONS 1,2,& 5;  
Children in Regions 6, 9-12 & Alaska; and Children in Regions 3, 4 & 7/8.  
For each region, there are 11 RATINGS: (GETTING NEEDED CARE, GETTING CARE  
QUICKLY, HOW WELL DOCTORS COMMUNICATE, CLAIMS PROCESSING, COURTEOUS AND  
HELPFUL OFFICE STAFF, CUSTOMER SERVICE, PERSONAL DOCTOR OR NURSE, HEALTH  
CARE, SPECIALTY CARE, HEALTH PLAN, and PRIMARY CARE MANAGER).  
*/
```

```
THE FIRST PARAMATER IN THE MACRO CALL INDICATES THE GROUP, THE THIRD PARAMATER  
INDICATES THE RATING, and the FOURTH PARAMATER INDICATES IF IT IS A MAIN or SUB  
PAGE(=0)  
OR IF IT IS A TREND PAGE (=2)
```

```
THIS MACRO CREATES A SEPARATE HTML PAGE FOR THE MAIN PAGE(1-0-0), SUB-PAGES1-0-1  
through 11  
FOR EACH RATING (EXCEPT PARENT'S RATINGS) AND A TREND PAGE FOR EACH RATING (1-0-  
1 through 11q

G.14 - ..\LOADWEB\QC_CHILD.SAS - Compare HTML scores with cooresponding scores in the Scores Database.

```

*=====;
*
* Programmer: Mark A. Brinkley
* Title: QC_child.SAS
* Client: 8687-100
* Date: 03-29-2000
*
* Purpose: This program is designed to read in ALL adult html
* files, extract the table data, and then compare
* this data to the input data which was used to
* create the html report cards. If everything is OK,
* then the comparison should yield no differences.
*
* Input files: 1) All F*.HTM files
* 2) TREND_C.SD2
*
* Modifications:
* 1) 02/14/2001 - Keith Rathbun, Remove outputting of permanent
* SAS Dataset. Deleted directory output file. Removed white
* space from program. Removed BY statement from proc compares.
* Added titles. Setup to run in LOADWEB directory on Jdrive.
*
* 2) 04/18/2001 - Chris Rankin -- added Macro to process
* frames and non-frames version separately
*
* 3) 11/27/2001 - Daniele Beahm -- revised code to check child
* html files
* Output files: Comparison summary listing
*
